RECOMMENDED CITATION

Pew Research Center, February, 2024, "Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

About Pew Research Center

Pew Research Center is a nonpartisan, nonadvocacy fact tank that informs the public about the issues, attitudes and trends shaping the world. It does not take policy positions. The Center conducts public opinion polling, demographic research, computational social science research and other data-driven research. It studies politics and policy; news habits and media; the internet and technology; religion; race and ethnicity; international affairs; social, demographic and economic trends; science; research methodology and data science; and immigration and migration. Pew Research Center is a subsidiary of The Pew Charitable Trusts, its primary funder.

© Pew Research Center 2024

How we did this

This Pew Research Center analysis focuses on public opinion of democracy and political representation in 24 countries in North America, Europe, the Middle East, the Asia-Pacific region, sub-Saharan Africa and Latin America. Satisfaction with democracy is examined in the context of long-term trend data. The report also explores views of nondemocratic systems of government. This is the first year since 2019 that the Global Attitudes Survey has included countries from Africa and Latin America due to [the coronavirus outbreak](#).

For non-U.S. data, this report draws on nationally representative surveys of 27,285 adults conducted from Feb. 20 to May 22, 2023. All surveys were conducted over the phone with adults in Canada, France, Germany, Greece, Italy, Japan, the Netherlands, South Korea, Spain, Sweden and the United Kingdom. Surveys were conducted face to face in Hungary, Poland, India, Indonesia, Israel, Kenya, Nigeria, South Africa, Argentina, Brazil and Mexico. In Australia, we used a mixed-mode probability-based online panel.

In the United States, we surveyed 3,576 U.S. adults from March 20 to 26, 2023. Everyone who took part in this survey is a member of the Center's American Trends Panel (ATP), an online survey panel that is recruited through national, random sampling of residential addresses. This way nearly all U.S. adults have a chance of selection. The survey is weighted to be representative of the U.S. adult population by gender, race, ethnicity, partisan affiliation, education and other categories. Read more about the [ATP's methodology](#).

In Israel, the survey was conducted from March 15 to April 24, 2023, before Hamas' attack on Israel on Oct. 7, 2023, and the start of the Israel-Hamas war.

Several countries have had national elections since this data was collected. Most recently, Indonesia held a general election in February 2024. Greece and Poland both held parliamentary elections, while Argentina, the Netherlands and Spain held general elections in 2023. In Nigeria, elections were held immediately before fieldwork began.

Throughout the report, we analyze attitudes by respondents' income and education. For income, we created lower, middle and higher income categories by splitting the respondents who provided this information into three roughly equal groups within each country.

To compare educational groups across countries, we standardize education levels based on the UN's International Standard Classification of Education (ISCED).

- In India, Indonesia, Kenya, Nigeria, South Africa and Brazil, the lower education category is below secondary education and the higher category is secondary or above.
- The lower education category is secondary education or below and the higher category is postsecondary or above in Canada, France, Germany, Greece, Hungary, Italy, Netherlands, Poland, Spain, Sweden, the UK, Australia, Japan, South Korea, Israel, Argentina and Mexico.
- In the U.S., the lower education category is some college or below and the higher category is a college degree or more.

Here are the [questions](#) used for the report, along with responses, and the [survey methodology](#).

Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working

Many say their country would be better off if more women, people from poor backgrounds and young adults held elective office

The health of democracy has declined significantly in many nations over the past several years, but the concept of representative democracy continues to be popular among citizens across the globe.

Solid majorities in each of the 24 countries surveyed by Pew Research Center in 2023 describe representative democracy, or a democratic system where representatives elected by citizens decide what becomes law, as a somewhat or very good way to govern their country.

However, enthusiasm for this form of government has slipped in many nations since 2017. And the survey highlights significant criticisms of the way it's working. Across the countries included in the study:

- A median of 59% are **dissatisfied with how their democracy is functioning.**
- 74% think **elected officials don't care** what people like them think.
- 42% say **no political party in their country represents their views.**

What is a median?

Throughout this report, median scores are used to help readers see overall patterns in the data. The median percentage is the middle number in a list of all percentages sorted from highest to lowest.

What – or who – would make representative democracy work better?

Many say policies in their country would improve if more elected officials were women, people from poor backgrounds and young adults.

Electing more women is especially popular among women, and voting more young people into office is particularly popular among those under age 40.

Views are more mixed on the impact of electing more businesspeople and labor union members.

Overall, there is less enthusiasm for having more

religious, although the idea is relatively popular in several middle-income nations (Argentina, Brazil, India, Indonesia, Kenya, Mexico, Nigeria and South Africa, as defined by the [World Bank](#)).

For this report, we surveyed 30,861 people in 24 countries from Feb. 20 to May 22, 2023. **In addition to this overview, the report includes chapters on:**

- [Attitudes toward different types of government systems](#)
- [Views about political representation](#)
- [Impact of electing more officials from different backgrounds](#)
- [Satisfaction with democracy and ratings for specific leaders and parties](#)

Read some of the report’s key findings below.

Many around the world say policies would improve if more women, people from poor backgrounds and young adults were in office

% who say policies in their country would ___ if more elected officials were ...

Note: Percentages are medians based on 24 countries. “Labor union members” not asked in Japan. Those who did not answer are not shown.

“Representative Democracy Remains a Popular Ideal, But People Around the World Are Critical of How It’s Working”

PEW RESEARCH CENTER

How do views of democracy stack up against nondemocratic approaches?

Even though most people believe **representative democracy** is a good way to govern, many are open to other forms of government as well.

Direct democracy – a system where citizens, rather than elected officials, vote directly on major issues – is also viewed favorably by majorities in nearly all countries polled.

In most countries, **expert rule** – in which experts, not elected officials, make key decisions – is also a popular alternative.

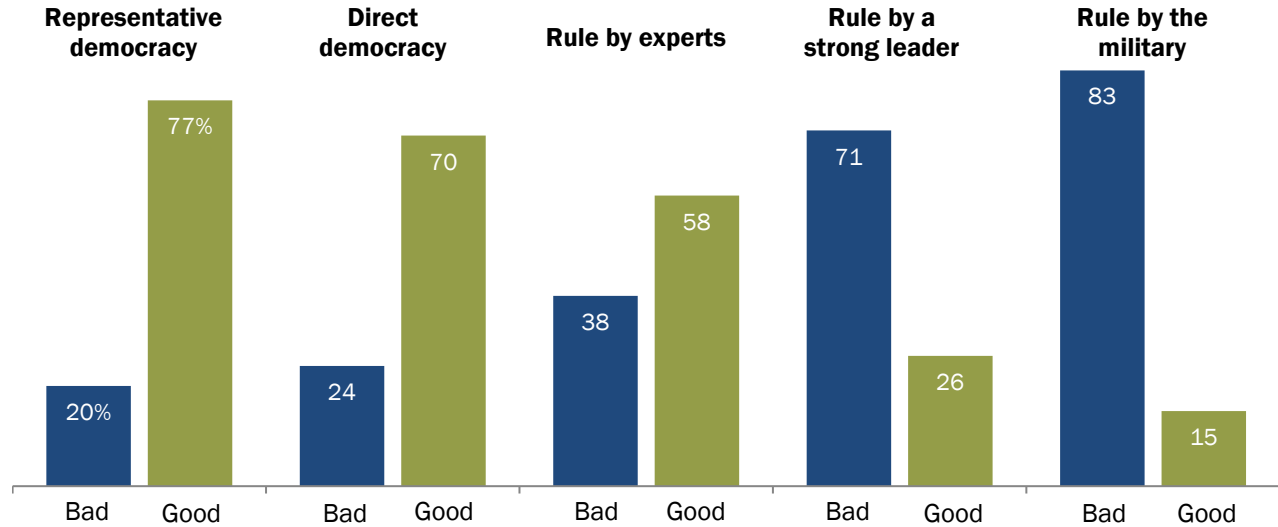

And there is notable support for more authoritarian models of government.

In 13 countries, a quarter or more of those surveyed think a system in which a **strong leader** can make decisions without interference from parliament or the courts is a good form of government. In four of the eight middle-income nations in the study, at least half of respondents express this view.

Even **military rule** has its supporters, including about a third or more of the public in all eight middle-income countries. There is less support in high-income nations, although 17% say military rule could be a good system in Greece, Japan and the United Kingdom, and 15% hold this view in the United States.

Support for different types of government across 24 nations

% who say each of the following would be a *good/bad* way of governing their country

Note: Those who did not answer are not shown. Percentages are medians based on 24 countries. Full question wording for political systems: Representative democracy, "A democratic system where representatives elected by citizens decide what becomes law"; Direct democracy, "A democratic system where citizens, not elected officials, vote directly on major national issues to decide what becomes law"; Rule by experts, "Experts, not elected officials, make decisions according to what they think is best for the country"; Rule by a strong leader, "A system in which a strong leader can make decisions without interference from [country-specific legislative body; e.g., parliament or Congress] or the courts"; Rule by the military, "The military rules the country."

"Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

Views on representative democracy

Strong support for representative democracy has declined in many nations since we last asked the question in 2017.

The share of the public describing representative democracy as a very good way to govern is down significantly in 11 of the 22 countries where data from 2017 is available (trends are not available in Australia and the U.S.).

For instance, 54% of Swedes said representative democracy was a very good approach in 2017, while just 41% hold this view today.

In contrast, strong support for representative democracy has risen significantly in three nations (Brazil, Mexico and Poland).

Fewer people now say representative democracy is a very good way to govern in many countries surveyed

% who say a system in which representatives elected by citizens decide what becomes law would be a **very good** way of governing their country

Note: Only statistically significant decreases shown.

 "Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

Views on autocratic leadership

Support for a government where a strong leader can make decisions without interference from courts or parliaments has increased in eight of 22 nations since 2017.

It is up significantly in all three Latin American nations polled, as well as in Kenya, India, South Korea, Germany and Poland.

Support for a strong leader model is especially common among people with less education and those with lower incomes.

People on the ideological right are often more likely than those on the left to support rule by a strong leader.

Support for rule by a strong leader has increased in 8 surveyed countries

% who say a system in which a strong leader can make decisions without interference from parliament or the courts would be a **good/bad** way of governing their country

Note: Only statistically significant increases in the share who say rule by a strong leader is a good way of governing shown. The name of the representative body in the question differs by country. For example, the question asks “Congress” in the U.S.

Source: Spring 2023 Global Attitudes Survey. Q42c.

“Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It’s Working”

PEW RESEARCH CENTER

Views on expert rule

Support for a system where experts, not elected officials, make key decisions is up significantly in most countries since 2017, and current views of this form of government may be tied at least in part to the [COVID-19 pandemic](#). For example, in the U.S., 59% of those who believe public health officials have done a good job of responding to the coronavirus outbreak think expert rule is a good system, compared with just 35% among those who say public health officials have done a bad job of dealing with the pandemic.

Support for rule by experts has grown in many countries surveyed since 2017

% who say a system in which experts, not elected officials, make decisions according to what they think is best for the country would be a **good/bad** way of governing their country

Note: The chart only shows the largest statistically significant increases in the share who say expert rule is a good way of governing. Differences also found in: Argentina, Canada, Indonesia, Japan, the Netherlands, Poland and South Africa.

“Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It’s Working”

PEW RESEARCH CENTER

Widespread belief that elected officials are out of touch

One factor driving people's dissatisfaction with the way democracy is functioning is the belief that politicians are out of touch and disconnected from the lives of ordinary citizens.

In every country surveyed, people who feel politicians don't care about people like them are less satisfied with democracy.

Across 24 nations, a median of 74% say elected officials in their country don't care what people like them think.

At least half of those surveyed hold this view in all countries but one (Sweden). Opinions about elected officials are particularly negative in Argentina, Greece, Nigeria, Spain and the U.S., where at least eight-in-ten believe elected officials don't care what people like them think.

Many don't think political parties represent them

While a median of 54% across the 24 countries surveyed say there is at least one party that represents their views well, 42% say there is *no* party that represents their views.

Israelis, Nigerians and Swedes are the most likely to say at least one party represents their opinions – seven-in-ten or more express this view in each of these countries.¹ In contrast, about four-in-ten or fewer say this in Argentina,

Most do not believe elected officials care what people like them think

% who say elected officials care/don't care what people like them think

Note: Those who did not answer are not shown.

¹ Israel survey was conducted March 15-April 24, 2023, before Hamas' attack on Israel on Oct. 7 and the start of the Israel-Hamas war.

France, Italy and Spain. Americans are evenly divided on this question.

In 18 countries where we asked about ideology, people who place themselves in the center are especially likely to feel unrepresented. And in some countries, those on the right are particularly likely to say there is at least one party that represents their views.

The U.S. illustrates this pattern: 60% of American conservatives say there is a party that represents their opinions, compared with 52% of liberals and just 40% of moderates.

Those in the ideological center are least likely to feel represented by parties

% who say there is **at least one party** in their country that represents their views well, among those on the ideological ...

Note: In the U.S., ideology is defined as conservative (right), moderate (center) and liberal (left).

“Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It’s Working”

PEW RESEARCH CENTER

People rate their country's leaders, parties and overall state of democracy poorly

The survey asked respondents how well they feel democracy is working in their country, and it also asked them to rate major national leaders and parties. Opinions on these questions may have shifted since the survey was conducted in spring 2023, but the overall results provide a relatively grim picture of the political mood in many nations. (Refer to [Appendix A](#) for details about the specific leaders and parties we asked about.)

- There are only seven countries where half or more are satisfied with the way democracy is working.
- Among the 24 national leaders included on the survey, just 10 are viewed favorably by half or more of the public.
- Opposition leaders fare even worse – only six get favorable reviews.
- Across the countries polled, we asked about 87 different political parties. Just 21 get a positive rating.
- Opinions vary greatly across regions and countries, but to some extent, we see more positive views about leaders and parties in middle-income nations.

Satisfaction with democracy and views of political leaders and parties across 24 countries, as of spring 2023

*% who are **satisfied/not satisfied** with the way democracy is working in their country*

*% who have a **favorable/unfavorable** view of the national leader*

*% who have a **favorable/unfavorable** view of their country's opposition leader(s)*

*% who have a **favorable/unfavorable** view of major political parties*

Note: Opposition leaders with 20% or higher "Don't know" responses were not included in the analysis. In some countries, respondents rated multiple opposition leaders. Respondents rated between two and six political parties in each country. Ratings of political parties were not asked in South Korea. Read Appendix A for leaders, opposition leaders and political parties included in each country.

PEW RESEARCH CENTER

How ideology relates to views of representation

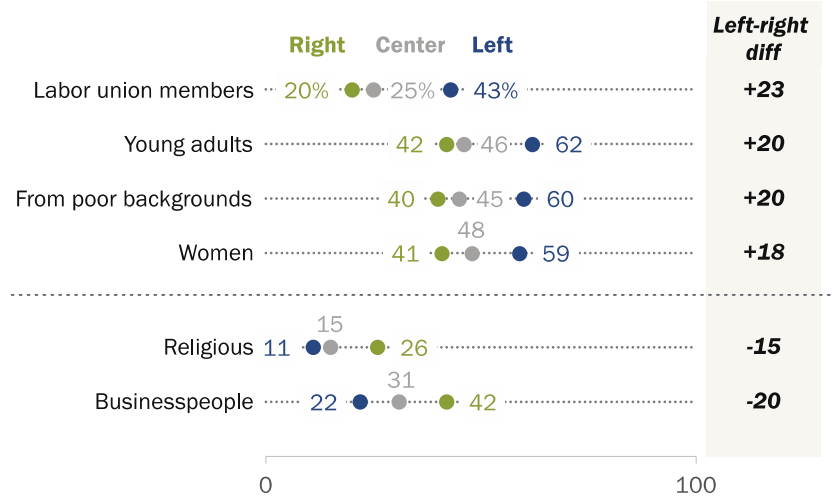

This report highlights significant ideological differences on many questions, including preferences regarding the characteristics of people who serve as elected officials.

Those on the political left are generally much more likely than those on the right to favor electing more labor union members, young adults, people from poor backgrounds and women.

Meanwhile, those on the right are more likely to say policies would improve if more religious people and businesspeople held elective office.

Ideological differences over what would improve representation

Median % who say policies in their country would **improve** if more elected officials were ____, among those on the ideological ...

Note: Percentages are medians based on 18 countries where ideology is asked. All differences shown are statistically significant. In the U.S., ideology is defined as conservative (right), moderate (center) and liberal (left).

Source: Spring 2023 Global Attitudes Survey. Q41a-f.

"Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

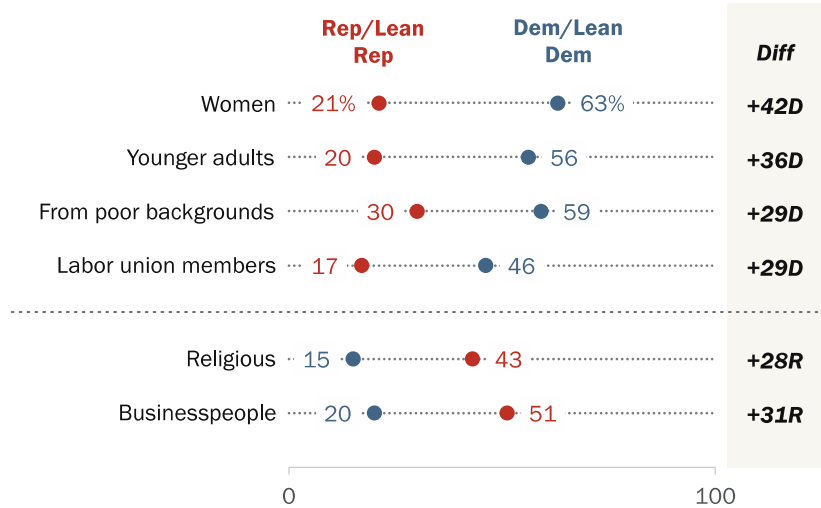

Ideological divisions on these topics are often especially sharp in the U.S. There are also very large partisan differences.

Democrats and Democratic-leaning independents are much more likely than Republicans and Republican leaners to favor having more women, young adults, people from poor backgrounds and labor union members in office.

Meanwhile, Republicans are more likely to endorse electing more religious people and businesspeople.

In the U.S., partisans prefer different demographic traits and backgrounds for elected officials

% of Americans who say policies in the U.S. would improve if more elected officials were ___, among ...

Note: All differences shown are statistically significant.

PEW RESEARCH CENTER

In their own words: Ideas for improving democracy

The survey also included the following open-ended question: “**What do you think would help improve the way democracy in this country is working?**” Respondents describe a wide variety of ideas for making democracy work better, but a few common themes emerge:

Improving political leadership: Respondents want politicians who are more responsive to the public’s needs, more attentive to the public’s voice, less corrupt and more competent. Many would also like political leaders to be more representative of their country’s population in terms of gender, age, race and other factors.

Government reform: Many believe improving democracy will require significant political reform in their country. Views about what reform should look like vary considerably, but suggestions include changing electoral systems, shifting the balance of power between institutions, and placing limits on how long politicians and judges can serve. In several countries, people express a desire for more direct democracy.

Expecting more from citizens: Respondents also emphasize that citizens have an important role to play in making democracy work better. They argue that citizens need to be more informed, engaged, tolerant and respectful of one another.

Improving the economy: Many people – and especially those in middle-income nations – emphasize the link between a healthy economy and a healthy democracy. Respondents mention creating jobs; curbing inflation; changing government spending priorities; and investing more in infrastructure, such as roads, hospitals, water, electricity and schools.

The full results of the open-ended question will be released in an upcoming Pew Research Center report. For a preview of some of the findings, read [“Who likes authoritarianism, and how do they want to change their government?”](#)

Additional reports and analyses

Pew Research Center regularly explores public attitudes toward democracy and related issues around the world. Check out some of our major publications on this topic from the past few years:

- [Majorities in most countries surveyed say social media is good for democracy](#) (February 2024)
- [Social Media Seen as Mostly Good for Democracy Across Many Nations, but U.S. is a Major Outlier](#) (December 2022)
- [Global Public Opinion in an Era of Democratic Anxiety](#) (December 2021)
- [Citizens in Advanced Economies Want Significant Changes to Their Political Systems](#) (October 2021)
- [Democratic Rights Popular Globally but Commitment to Them Not Always Strong](#) (February 2020)
- [European Public Opinion Three Decades After the Fall of Communism](#) (October 2019)

The Center also regularly examines U.S. public opinion on topics related to democracy. Some of the most recent releases include:

- [Tuning Out: Americans on the Edge of Politics](#) (January 2024)
- [Americans' Dismal Views of the Nation's Politics](#) (September 2023)

1. Attitudes toward different types of government systems

Respondents in 24 countries were asked about different forms of governance, including representative democracy, direct democracy, autocracy, technocracy and military rule.

- Majorities in every country polled say that a system in which **democratically elected representatives** decide what becomes law would be a good way to run their country.
- **Direct democracy** also receives widespread support.
- **Expert rule** is popular in many countries, and support has increased since the question was last asked in 2017.
- **Systems led by a strong leader or the military** are less popular options, although significant minorities – and in some cases, majorities – endorse these approaches.

Views on representative democracy

Elements of representative democracy are present in each of the countries surveyed. And although [many express dissatisfaction with the way democracy is working in their country](#), majorities in all of these countries believe representative democracy to be a somewhat or very good form of governance.

Across the 24 nations polled, a median of 77% express support for representative democracy.

Despite frustration with the functioning of democracy, a median of only 20% believe that rule by elected representatives is a bad way to govern.

Widespread support for representative democracy across 24 countries surveyed

*% who say a democratic system where representatives elected by citizens decide what becomes law would be a **good/bad** way of governing their country*

Note: Those who did not answer are not shown.

“Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It’s Working”

PEW RESEARCH CENTER

Changes in views over time

The overall share of the public saying that democracy is a good system has held steady in most countries since 2017.

However, the share of respondents who say representative democracy is a *very* good way to govern has declined significantly in 10 of 22 countries where trends are available.

Factors related to views on representative democracy

Views of democracy, elected officials and parties: In most countries, those who report satisfaction with the functioning of democracy are more likely to say that representative democracy is a good system.

In 19 countries, this type of government is especially popular among respondents who think their views are represented by at least one party. And in half the countries surveyed, support for representative democracy is higher among those who believe elected representatives care about their opinions.

Economic situation: Opinions about the state of the economy are also related to views about representative democracy. Those who say their country's economic situation is good are more likely to support representative democracy in about half of the countries surveyed.

Income: In nine countries, people with higher incomes are more likely to say that this is a good way to govern than people with lower incomes.

Education: Those who have more education have more favorable views of representative democracy than those with less education in 11 countries.

Confidence in representative democracy has declined in several nations

*% who say a democratic system where representatives elected by citizens decide what becomes law would be a **very good** way of governing their country*

"Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

Views on direct democracy

We also asked respondents about direct democracy, described as a system where citizens, rather than their elected representatives, vote directly on major national issues.

Of the five systems respondents were asked about, direct democracy is the second-most popular. A median of 70% say it would be a good way to run their country, and around half or more say this in every country surveyed.

Support for rule by direct vote is lowest in Sweden, where opinion is split: 49% say it is a good way to govern and 49% say it is bad.

Most say direct democracy is a good way to govern

% who say a democratic system where citizens, not elected officials, vote directly on major national issues to decide what becomes law would be a **good/bad** way of governing their country

Note: Those who did not answer are not shown.

Source: Spring 2023 Global Attitudes Survey. Q42a.

"Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

Changes in views over time

Support for direct democracy has seen little change since 2017. Notably, however, it is up by 7 percentage points in the UK.

The last time British respondents were asked about direct democracy was less than a year after the Brexit referendum, when 52% of the votes were cast in favor of the [UK withdrawing from membership in the European Union](#). [Brexit took effect in January 2020](#).

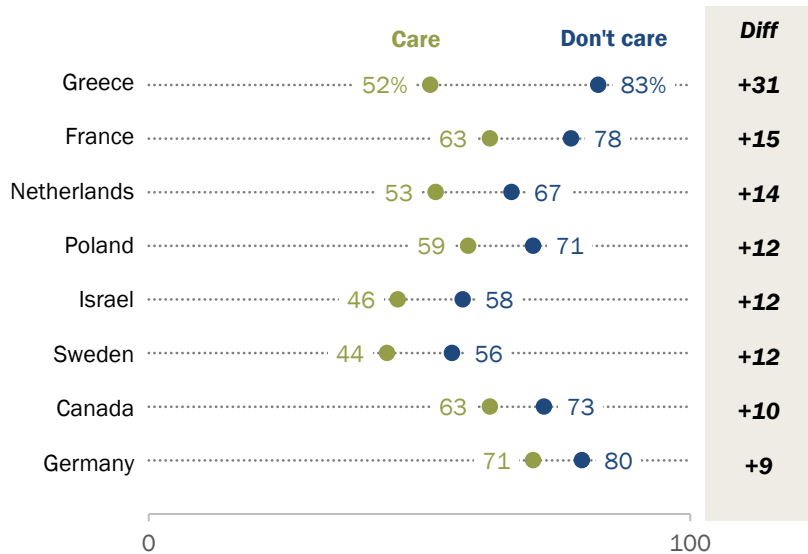

Connections between views of elected officials and direct democracy

Respondents' attitudes toward politicians in their own countries inform their view of rule by direct vote.

In a third of countries surveyed, respondents are more likely to favor direct democracy if they say that elected officials do not care what people like them think.

Those who feel alienated from their elected representatives are more likely to support direct democracy in some countries

*% who say a democratic system where citizens, not elected officials, vote directly on major national issues to decide what becomes law would be a **good** way of governing their country, among those who say that elected officials ___ what people like them think*

Note: Only statistically significant differences are shown.

 "Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

Views on expert rule

In addition to the two forms of democracy, respondents were asked about their attitudes toward technocracy. This system of government relies on experts, rather than elected officials, to make decisions according to what they think is best for the country.

Majorities in two-thirds of the countries surveyed say this would be a good way to govern. And in Hungary and India, roughly eight-in-ten favor it.

Favorable views are least common in Brazil, France and Israel. Still, about four-in-ten in each of these nations would trust experts to run the country.

Considerable support for rule by experts

“Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It’s Working”

PEW RESEARCH CENTER

Changes in views over time

Since 2017, the number of technocracy supporters has gone up in most of the countries surveyed.

This shift could be tied, at least in part, to the COVID-19 pandemic. Since 2020, many have turned to scientists and medical professionals for their expertise on how to manage the crisis.

Analysis in the U.S. shows that support for expert rule is related to perceptions of experts during the pandemic. Among the people who believe public health officials have done a good job of responding to COVID-19, 59% think expert rule is a good governmental system, compared with just 35% among those who say public health officials have done a bad job of dealing with the pandemic.

Technocracy has gained support in most countries surveyed since 2017

PEW RESEARCH CENTER

Views on autocracy

Respondents were asked to consider a system in which a strong leader is free to make decisions without interference from a representative body or independent judiciary.

Autocratic rule is generally unpopular: In all but five of the countries surveyed, majorities reject it. In Canada and most of Europe, half or more say that it is a *very* bad way to govern.

Still, a median of around a quarter of all respondents are open to it, including large shares of those living in most middle-income countries.

In Mexico and Kenya, views are roughly split between those who say it is a good way to govern and those who say it is bad. Two-thirds of Indians and about half of Indonesians endorse this form of government.

Even in higher-income democracies, substantial minorities describe rule by a strong leader as a good way to govern, including one-in-four or more in Japan, Poland,

Broad opposition to autocracy, although support is significant in some nations

% who say a system in which a strong leader can make decisions without interference from parliament or the courts would be a **good/bad** way of governing their country

Note: Those who did not answer are not shown. The name of the representative body in the question differs by country. For example, the question asks "Congress" in the U.S.

“Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It’s Working”

PEW RESEARCH CENTER

The U.S. stands out to some extent from this pattern: It has the highest per-capita GDP of the countries surveyed, but about half of the other countries express less support for autocracy than the U.S.

Overall, support for a strong leader model is also lower in countries that receive higher ratings from research organizations that rate the health of democracy, such as the [Economist Intelligence Unit](#), [Freedom House](#), [International IDEA](#) and the [Varieties of Democracy project](#).

Changes in views over time

In eight of 22 countries where trends over time are available, the share of respondents who say rule by a strong leader is a good way to govern has gone up. This group of countries is diverse and includes some in Latin America, Africa, Asia and Europe.

Support for a strong leader model is down in four nations: Hungary, Israel, Italy and Sweden.²

In several countries, significant increases in support for autocracy

*% who say a system in which a strong leader can make decisions without interference from parliament or the courts would be a **good** way of governing their country*

² Israel survey was conducted March 15-April 24, 2023, before Hamas’ attack on Israel on Oct. 7 and the start of the Israel-Hamas war.

Factors related to views of autocracy

Income: People with lower incomes are more accepting of the idea of a strong leader whose power goes unchecked in 11 countries.

Education: In 15 countries, those with less education are more likely than those with more education to say an autocratic system is a good way of governing.

Ideology: Those on the political right are less likely to say rule by a strong leader is a *very bad* way to govern in 13 of the 18 countries where ideology is measured – including most of the European countries in our survey and several other advanced economies.

In particular, people who have favorable views of right-wing populist parties in Europe are less likely to characterize autocracy as a very bad system. Often, the difference is

considerable: In Germany, 24% of those who favor Alternative for Germany (AfD) say that rule by a strong leader is very bad. The share who strongly reject autocracy is much higher among Germans who view AfD unfavorably (54%). (Refer to [Appendix B](#) for more information on how we classify populist parties.)

Views on military rule

Of the five systems of government that respondents were asked about, military rule is the least popular. A median of only 15% across 24 countries, including some who have previously experienced military rule, think this would be a good way to run their country. In over half of the countries surveyed, majorities believe it would be a *very* bad way to govern.

In North America, Europe, Australia, Israel and South Korea, military rule is decidedly unpopular: Eight-in-ten or more call it a bad system.

There has been relatively little change on this question since it was last asked in 2017.

Most reject military rule, but a select few embrace it

2. Views about political representation

Our survey finds that many people worldwide see room for improvement when it comes to how political parties, and especially elected officials, represent them.

A median of just over four-in-ten say there is no political party in their country that represents their views, and very few feel elected officials care what people like them think.

Views of elected officials

Across 24 countries, a median of 74% say elected officials *do not* care what people like them think, while 26% say the opposite.

In Argentina, Greece, Nigeria, Spain and the U.S., eight-in-ten or more say elected officials do not care about the opinions of people like them. And in another eight countries, roughly three-quarters or more hold this view.

Sweden is the only country surveyed where a majority (56%) of people believe that elected officials care what people like them think.

Factors related to views of elected officials

Economic situation: In every country surveyed, those who say the economic situation in their country is good are more likely than those who say it is bad to believe that most elected officials care about people like them. In Canada, 55% of those who give the economic situation a positive rating hold this view, compared with only 21% among those who rate the economy negatively.

Most do not believe elected officials care what people like them think

% who say elected officials *care*/*don't care* what people like them think

Note: Those who did not answer are not shown.

"Representative Democracy Remains a Popular Ideal, But People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

Support for the governing party: In 19 countries, people who support the governing party are more likely than those who do not to say elected officials care what people like them think. For example, in Greece, there is a 31 percentage point difference between those who support the ruling party, the right-of-center New Democracy (39%), and those who do not (8%).

There are differences of 20 points or more in Canada, France, Germany, Hungary, Kenya, the Netherlands and Poland.

For more information on how we classify governing party supporters, read [Appendix C](#).

How represented do people feel by political parties?

A median of 54% across 24 nations say at least one party in their country represents their views well, while 42% say none of the parties in their country represent their views well.

Israelis, Nigerians and Swedes are the most likely to feel represented by at least one party, with roughly three-quarters in each country holding this opinion. Meanwhile, more than half in Argentina, France, Italy, Mexico, South Korea and Spain believe *none* of the parties in their country represent their views well.

And in the U.S., opinions are divided. Equal shares say their views are represented by at least one party and by none of the parties.

Do people feel represented by at least one political party in their country?

3. Would electing more officials from different backgrounds improve policy?

Many people generally believe that policies in their country would improve if the types of people in politics changed.

Having more women, young adults or people from poor backgrounds in office are seen as beneficial, especially by people on the political left.

Fewer expect positive change to come from having more businesspeople, labor union members or religious people hold elected office.

What if more elected officials were women?

Although they make up just under [half of the global population](#), women make up only 26.7% of national legislative bodies around the world, [according to the Inter-Parliamentary Union](#).

Across the 24 nations surveyed, a median of 50% say policies in their country would improve if more elected officials were women, while a median of only 8% think they would get worse.

Substantial numbers say policies in their country would improve if more women were elected

% who say policies in their country would ___ if more elected officials were women

Note: Those who did not answer are not shown.

Note: Those who did not answer are not shown.

Source: Spring 2023 Global Attitudes Survey. Q2.

"Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

Satisfaction with democracy

Ratings of democracy are generally negative across the 24 countries surveyed. A median of 59% say they are dissatisfied with the way democracy is working in their country. Half or more in 17 countries hold this view.

Nearly two-thirds of Americans are dissatisfied with how democracy is functioning in the U.S. Seven-in-ten or more in France, Greece and Spain are also dissatisfied with the state of their democracy.

Nigerians, who were polled soon after their national election in February 2023, are among the most dissatisfied (75%), along with South Africans (76%).

While negative views of democracy are fairly widespread, a few countries stand out for their high levels of satisfaction. For example, roughly three-quarters of Swedes and Indians are happy with the way democracy is working in their country.

Changes in satisfaction with democracy over time

In 14 of 24 countries, satisfaction with democracy has decreased significantly since the last time this question was asked.

The largest drop can be seen in France, with a 17 percentage point decrease in satisfaction between 2022 and 2023.

There are only two countries where satisfaction with democracy has increased significantly in recent years: Australia (compared with 2022) and Mexico (since 2019).

Satisfaction with democracy has decreased over time

"Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

Factors impacting satisfaction with democracy

Support for the governing party: Of course, people who support the party in power are much more likely to be satisfied with democracy in their country than people who don't support the governing party.

The difference between these groups can be very large. For example, 70% of Hungarians who support Fidesz are satisfied with democracy, compared with only 21% of those who don't support the party.

Yet, in some countries, even supporters of the governing party or coalition have relatively low levels of satisfaction.

Economic situation: In every country surveyed, people who think the current economic situation in their country is good are much more likely to also be content with how democracy is working.

Poland is a good example of this pattern: 88% of Poles who say the economic situation is

Low satisfaction with democracy among those who do not support the governing party

"Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

good are satisfied with democracy, while only 23% among those who think the economic situation is bad agree.

Views of national leaders, opposition leaders and political parties

Mirroring the dissatisfaction many people feel with the way democracy is working, people across the countries surveyed generally do not have very positive views of their country's major political leaders or parties.

A median of 45% have a favorable view of the head of their government or head of state, while 52% have a negative opinion.

Despite many political leaders receiving lukewarm ratings, their opposition generally fares worse. A median of just 36% of people rate the opposition leaders in their country favorably. This analysis includes ratings for 27 leaders across the countries polled.

Our survey also asked people to rate their views of between two and six major political parties in their country, including governing and opposition

Satisfaction with democracy and views of political leaders and parties

% who are/have a ___ in their country, as of spring 2023

■ High-income countries ■ Middle-income countries

Satisfied with democracy

Favorable view of the national leader

Favorable view of the main opposition leader

Favorable view of the major political parties

Note: Opposition leaders for whom 25% or more did not provide a rating were not included in the analysis. In some countries, respondents rated multiple opposition leaders. Respondents rated between two and six political parties in each country. Read Appendix A for the leaders, opposition leaders and political parties included in each country. Source: Spring 2023 Global Attitudes Survey. Q2, Q4a-d & Q5.

"Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

parties. Across the countries surveyed, people rated a total of 87 political parties. Of these, only 21 received positive ratings from half or more of the public.

In many of the countries surveyed, *none* of the parties we asked about were rated positively by more than half of people.

For example, Canadians rated their country's three largest federal parties: the Liberal Party, the Conservative Party and the New Democratic Party. Only around 45% of Canadians had a positive rating of each one.

Factors impacting views of national leaders

Support for the governing party: In almost every country polled, views of national leaders are much more positive among people who support the leader's party or coalition.

Economic situation: As with views of democracy, economic ratings can impact how people feel about their country's leader. Among those who think their country's economy is doing well, a median of 69% have a favorable view of the leader. Just over a third of those who think their economy is doing poorly have a favorable assessment of their country's leader.

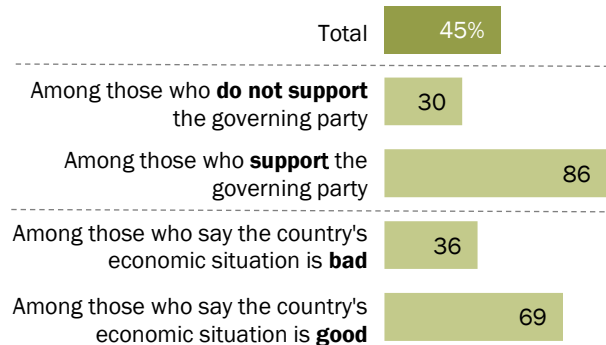

Age: In 11 countries, people 40 and older have more positive views of their leader than adults under 40.

Read "[Views about political representation](#)" for more about how people feel about elected officials and political parties in their country.

CORRECTION (March 20, 2024): A previous version of the chart showing favorability of national leaders by view of the economy included an incorrect data label. The chart has been updated with the correct label.

Support for national leaders is generally low across 24 countries

% who have a **favorable** view of the national leader, as of spring 2023

Note: Total and national economy percentages are medians based on 24 countries. Governing party percentages are medians based on 23 countries. See Appendix A for the leaders asked about in all countries.

"Representative Democracy Remains a Popular Ideal, but People Around the World Are Critical of How It's Working"

PEW RESEARCH CENTER

Appendix A: Political leaders and parties by country

All ratings for political leaders and parties were collected between Feb. 20 and May 22, 2023. Refer to our [international methodology website](#) for specific fieldwork dates for each country. We worked with local research partners in each country to identify the most relevant politicians and parties as of fall 2022, when the questionnaire was finalized.

National leaders included in the survey were the head of state or head of government in office at the time of fielding. Since fieldwork ended, Indonesia held a general election in which the then-incumbent president, Joko Widodo, was not eligible to run due to term limits. Argentina elected a new president, Javier Milei, who took office in December 2023. In Nigeria, fieldwork took place immediately following the election on Feb. 25, 2023. Bola Tinubu won the election but did not officially take office until May, after fieldwork was complete. Therefore, we classify former president Muhammadu Buhari as the leader of Nigeria at the time of the survey.

Politicians included as opposition leaders in the survey are generally the leader of the main opposition party. In some instances where an election occurred around the time of the survey, we measured attitudes toward the leading candidate(s). And in some countries, if there was no clear single opposition leader, we asked for ratings of multiple politicians.

In some countries, the opposition leader when the survey was fielded is now part of a governing coalition. In Poland, for example, [Donald Tusk became prime minister](#) after his party, Civic Platform, and other opposition parties won enough seats in the October 2023 elections to form a majority coalition. For our analysis, President Andrzej Duda is considered the leader of the country since the president has [the power to appoint the prime minister](#) and, in specific situations, dissolve parliament.

In the Netherlands, then-opposition leader Geert Wilders' Party for Freedom won the most seats in the November 2023 elections, though this far [he has struggled to form a coalition](#). Until a coalition government is set, Mark Rutte remains the leader of a caretaker government and the next leader is unknown.

We also asked about between two and six political parties in each country depending on the number of major parties, as well as input from our local research partners. These generally include the main party in power or the largest party or parties in a coalition government, and at least one major opposition party. In Europe, we have historically asked for ratings of major populist parties, even if they often do not receive large shares of the votes in national elections.

Ratings of national leaders, as of spring 2023

% who have a ___ of ...

PEW RESEARCH CENTER

Appendix B: Classifying European political parties

Classifying parties as populist

Although experts generally agree that populist political leaders or parties display high levels of anti-elitism, definitions of populism vary. We use three measures to classify populist parties: anti-elite ratings from the [2019 Chapel Hill Expert Survey \(CHES\)](#), Norris' [Global Party Survey](#) and [The PopuList](#). We define a party as populist when at least two of these three measures classify it as such.

CHES, which was conducted from February to May 2020, asked 421 political scientists specializing in political parties and European integration to evaluate the 2019 positions of 277 European political parties across all European Union member states. CHES results are regularly used by academics to classify parties with regard to their left-right ideological leanings, their key party platform positions and their degree of populism, among other things.

We measure anti-elitism using an average of two variables in the CHES data. First, we used “PEOPLE_VS_ELITE,” which asked the experts to measure the parties with regard to their position on direct vs. representative democracy, where 0 means that the parties support elected officeholders making the most important decisions and 10 means that “the people,” not politicians, should make the most important decisions. Second, we used “ANTI-ELITE_SALIENCE,” which is a measure of the salience of anti-establishment and anti-elite rhetoric for that particular party, with 0 meaning not at all salient and 10 meaning extremely salient. The average of these two measures is shown in the table below as “anti-elitism.” In all countries, we consider parties that score at or above a 7.0 as “populist.”

The [Global Party Survey](#), which was conducted from November to December 2019, asked 1,861 experts on political parties, public opinion, elections and legislative behavior to evaluate the ideological values, issue position and populist rhetoric of parties in countries on which they are an expert, classifying a total of 1,051 parties in 163 countries. We used “TYPE_POPULISM,” which categorizes populist rhetoric by parties. We added only “strongly populist” parties using this measure. In Italy, experts were asked to categorize the Center-Right coalition instead of individual parties within the coalition. The coalition includes Lega, Forza Italia and Brothers of Italy. For all three parties, we have used the coalition rating of “strongly populist.”

The PopuList is an ongoing project to classify European political parties as populist, far right, far left and/or euroskeptic. [The project](#) specifically looks at parties that “obtained at least 2% of the vote in at least one national parliamentary election since 1998.” It is based on collaboration

between academic experts and journalists. The PopuList classifies parties that emphasize the will of the people against the elite as populist.³

Reform UK, formerly the Brexit Party, is only classified as populist on one measure but is still included for analysis in the report. It is not included in the PopuList and does not meet our anti-elite CHES threshold of 7.0, but is considered a right-wing populist party by the Global Party Survey and [other experts](#).

Classifying parties as left, right or center

We can further classify these traditional and populist parties into three groups: left, right and center. When classifying parties based on ideology, we relied on the variable “LRGEN” in the CHES dataset, which asked experts to rate the positions of each party in terms of its overall ideological stance, with 0 meaning extreme left, 5 meaning center and 10 meaning extreme right. We define left parties as those that score below 4.5 and right parties as those above 5.5. Center parties have ratings between 4.5 and 5.5.

³ Mudde, Cas. 2004. [“The Populist Zeitgeist.”](#) Government and Opposition.

European populist party classifications

Party	Country	2019 Left-right	2019 Anti-elitism	2019 Global Party Survey	The PopuList
Populist parties on the left					
La France Insoumise	France	1.3	8.3	Strongly populist	Populist
Podemos	Spain	1.9	7.7	--	Populist
Syriza	Greece	2.3	7.0	--	Populist
Populist parties in the center					
Five Star Movement (M5S)	Italy	4.8	9.2	Strongly populist	Populist
Populist parties on the right					
Forza Italia	Italy	6.9	4.1	Strongly populist	Populist
Law and Justice	Poland	7.6	6.9	Strongly populist	Populist
Jobbik	Hungary	7.7	6.1	Strongly populist	Populist
Reform UK*	UK	8.2	5.3	Strongly populist	--
Fidesz	Hungary	8.3	6.5	Strongly populist	Populist
Sweden Democrats	Sweden	8.5	7.5	Strongly populist	Populist
Party for Freedom (PVV)	Netherlands	8.7	9.5	Strongly populist	Populist
Lega	Italy	8.8	7.6	Strongly populist	Populist
Greek Solution	Greece	9.0	7.6	--	Populist
Brothers of Italy	Italy	9.1	7.3	Strongly populist	Populist
Alternative for Germany (AfD)	Germany	9.2	9.0	Strongly populist	Populist
Forum for Democracy (FvD)	Netherlands	9.5	9.7	--	Populist
Vox	Spain	9.7	4.1	Strongly populist	Populist
National Rally	France	9.8	8.6	Strongly populist	Populist

*Previously named the Brexit Party.

Notes: Left-right indicates the average score CHES experts gave each party on an 11-point left-right scale. Scores for anti-elitism are an average of party position on direct vs. representative democracy and the salience of anti-elite rhetoric within the party.

PEW RESEARCH CENTER

Appendix C: Political categorization

For this analysis, we grouped people into two political categories: those who support the governing political party (or parties) in each country, and those who do not. These categories were coded based on the party or parties in power at the time the survey was fielded, and on respondents' answers to a question asking them which political party, if any, they identified with in their country.⁴

In countries where multiple political parties govern in coalition (as in many European countries), survey respondents who indicated support for any parties in the coalition were grouped together. In Germany, for example, where the Social Democratic Party governed with the Alliance 90/The Greens and the Free Democratic Party at the time of the survey, supporters of all three parties were grouped together. In countries where different political parties occupy the executive and legislative branches of government, the party holding the executive branch was considered the governing party.

Survey respondents who did not indicate support for any political party, or who refused to identify with one, were considered to be *not* supporting the government in power.

Below is a table that outlines the governing political parties in each survey country.

⁴ Governing parties were not updated to account for elections that occurred after the survey was fielded and resulted in a new party (or parties) serving in government. Language used to measure party identification varied from country to country.

Political categorization

Country	Governing political party (or parties)
Argentina	Frente de Todos
Australia	Australian Labor Party (ALP)
Brazil	AVANTE (formerly PToDoB), Brazilian Socialist Party (PSB), Christian Workers Party (PCT), Communist Party of Brazil (PDdoB), Green Party (PV), Republican Party of the Social Order (PROS), Socialism and Liberty Party (PSOL), Solidarity (SD), Sustainability Network (REDE), Workers' Party
Canada	Liberal Party
France	Renaissance (formerly En Marche)
Germany	Alliance 90/The Greens, Free Democratic Party (FDP), Social Democratic Party (SDP)
Greece	New Democracy (ND)
Hungary	Christian Democratic People's Party (KNDP), Fidesz
India	All India Anna Dravida Munnetra Kazhagam (AIADMK), Bharatiya Janata Party, Lok Janshakti Party
Indonesia	Indonesian Democratic Party of Struggle (PDI-P)
Israel	Likud, Religious Zionist Party, Shas, United Torah Judaism
Italy	Brothers of Italy, Forza Italia, Lega, Us Moderates (Noi Moderati)
Japan	Komeito (NKP), Liberal Democratic Party (LDP)
Kenya	Amani National Congress, FORD – Kenya, Kenya Kwanza, United Democratic Alliance
Mexico	Ecologist Green Party of Mexico (PVEM), Labor Party (PT), Morena
Netherlands	Christian Democratic Appeal (CDA), ChristianUnion (CU), Democrats 66 (D66), People's Party for Freedom and Democracy (VVD)
Nigeria	All Progressives Congress (APC)
Poland	Law and Justice (PiS)
South Africa	African National Congress (ANC)
Spain	Catalunya en Comú, Podemos, Spanish Socialist Workers' Party, United Left (IU)
Sweden	Christian Democrats, Liberals, Moderate Party
UK	Conservative Party
U.S.	Democratic Party

Note: Only parties represented in the federal government are shown. Support for governing party is not asked in South Korea.

Methodology

About Pew Research Center's Spring 2023 Global Attitudes Survey

Results for the survey are based on telephone, face-to-face and online interviews conducted under the direction of Gallup, Kantar Public, Langer Research Associates and Social Research Centre. The results are based on national samples, unless otherwise noted. Here are more details about our [international survey methodology and country-specific sample designs](#). Results for the U.S. survey are based on data from the American Trends Panel.

The American Trends Panel survey methodology

Overview

The American Trends Panel (ATP), created by Pew Research Center, is a nationally representative panel of randomly selected U.S. adults. Panelists participate via self-administered web surveys. Panelists who do not have internet access at home are provided with a tablet and wireless internet connection. Interviews are conducted in both English and Spanish. The panel is being managed by Ipsos.

Data in this report is drawn from ATP Wave 124, conducted from March 20 to March 26, 2023, and includes an [oversample](#) of Hispanic men, non-Hispanic Black men and non-Hispanic Asian adults to provide more precise estimates of the opinions and experiences of these smaller demographic subgroups. These oversampled groups are weighted back to reflect their correct proportions in the population. A total of 3,576 panelists responded out of 4,058 who were sampled, for a response rate of 88%. The cumulative response rate

American Trends Panel recruitment surveys

Recruitment dates	Mode	Invited	Joined	Active panelists remaining
Jan. 23 to March 16, 2014	Landline/ cell RDD	9,809	5,338	1,503
Aug. 27 to Oct. 4, 2015	Landline/ cell RDD	6,004	2,976	881
April 25 to June 4, 2017	Landline/ cell RDD	3,905	1,628	434
Aug. 8 to Oct. 31, 2018	ABS	9,396	8,778	4,116
Aug. 19 to Nov. 30, 2019	ABS	5,900	4,720	1,472
June 1 to July 19, 2020; Feb. 10 to March 31, 2021	ABS	3,197	2,812	1,541
May 29 to July 7, 2021; Sept. 16 to Nov. 1, 2021	ABS	1,329	1,162	788
May 24 to Sept. 29, 2022	ABS	3,354	2,869	1,697
	Total	42,894	30,283	12,432

Note: RDD is random-digit dial; ABS is address-based sampling. Approximately once per year, panelists who have not participated in multiple consecutive waves or who did not complete an annual profiling survey are removed from the panel. Panelists also become inactive if they ask to be removed from the panel.

PEW RESEARCH CENTER

accounting for nonresponse to the recruitment surveys and attrition is 4%. The break-off rate among panelists who logged on to the survey and completed at least one item is 1%. The margin of sampling error for the full sample of 3,576 respondents is plus or minus 2.0 percentage points.

Panel recruitment

The ATP was created in 2014, with the first cohort of panelists invited to join the panel at the end of a large, national, landline and cellphone random-digit-dial survey that was conducted in both English and Spanish. Two additional recruitments were conducted using the same method in 2015 and 2017, respectively. Across these three surveys, a total of 19,718 adults were invited to join the ATP, of whom 9,942 (50%) agreed to participate.

In August 2018, the ATP switched from telephone to address-based recruitment. Invitations were sent to a stratified, random sample of households selected from the U.S. Postal Service's Delivery Sequence File. Sampled households receive mailings asking a randomly selected adult to complete a survey online. A question at the end of the survey asks if the respondent is willing to join the ATP. In 2020 and 2021 another stage was added to the recruitment. Households that did not respond to the online survey were sent a paper version of the questionnaire, \$5 and a postage-paid return envelope. A subset of the adults who returned the paper version of the survey were invited to join the ATP. This subset of adults received a follow-up mailing with a \$10 pre-incentive and invitation to join the ATP.

Across the five address-based recruitments, a total of 23,176 adults were invited to join the ATP, of whom 20,341 agreed to join the panel and completed an initial profile survey. In each household, one adult was selected and asked to go online to complete a survey, at the end of which they were invited to join the panel. Of the 30,283 individuals who have ever joined the ATP, 12,432 remained active panelists and continued to receive survey invitations at the time this survey was conducted.

The U.S. Postal Service's Delivery Sequence File has been estimated to cover as much as 98% of the population, although some studies suggest that the coverage could be in the low 90% range.⁵ The American Trends Panel never uses breakout routers or chains that direct respondents to additional surveys.

Sample design

The overall target population for this survey was non-institutionalized persons ages 18 and older living in the U.S., including Alaska and Hawaii. It featured a stratified random sample from the ATP in which Hispanic men, non-Hispanic Black men and non-Hispanic Asian adults were

⁵ AAPOR Task Force on Address-based Sampling. 2016. "[AAPOR Report: Address-based Sampling](#)."

selected with certainty. The remaining panelists were sampled at rates designed to ensure that the share of respondents in each stratum is proportional to its share of the U.S. adult population to the greatest extent possible. Respondent weights are adjusted to account for differential probabilities of selection as described in the Weighting section below.

Questionnaire development and testing

The questionnaire was developed by Pew Research Center in consultation with Ipsos. The web program was rigorously tested on both PC and mobile devices by the Ipsos project management team and Pew Research Center researchers. The Ipsos project management team also populated test data that was analyzed in SPSS to ensure the logic and randomizations were working as intended before launching the survey.

Incentives

All respondents were offered a post-paid incentive for their participation. Respondents could choose to receive the post-paid incentive in the form of a check or a gift code to Amazon.com or could choose to decline the incentive. Incentive amounts ranged from \$5 to \$20 depending on whether the respondent belongs to a part of the population that is harder or easier to reach. Differential incentive amounts were designed to increase panel survey participation among groups that traditionally have low survey response propensities.

Data collection protocol

The data collection field period for this survey was March 20 to March 26, 2023. Postcard notifications were mailed to all ATP panelists with a known residential address on March 20.

Invitations were sent out in two separate launches: soft launch and full launch. Sixty panelists were included in the soft launch, which began with an initial invitation sent on March 20. The ATP panelists chosen for the initial soft launch were known responders who had completed previous ATP surveys within one day of receiving their invitation. All remaining English- and Spanish-speaking sampled panelists were included in the full launch and were sent an invitation on March 21.

Invitation and reminder dates, ATP Wave 124

All panelists with an email address received an email invitation and up to two email reminders if they did not respond to the survey. All ATP

	Soft launch	Full launch
Initial invitation	March 20, 2023	March 21, 2023
First reminder	March 23, 2023	March 23, 2023
Final reminder	March 25, 2023	March 25, 2023

PEW RESEARCH CENTER

panelists who consented to SMS messages received an SMS invitation and up to two SMS reminders.

Data quality checks

To ensure high-quality data, the Center’s researchers performed data quality checks to identify any respondents showing clear patterns of satisficing. This includes checking for very high rates of leaving questions blank, as well as always selecting the first or last answer presented. As a result of this checking, eight ATP respondents were removed from the survey dataset prior to weighting and analysis.

Weighting

The ATP data is weighted in a multistep process that accounts for multiple stages of sampling and nonresponse that occur at different points in the survey process. First, each panelist begins with a base weight that reflects their probability of selection for their initial recruitment survey. These weights are then rescaled and adjusted to account for changes in the design of ATP recruitment surveys from year to year. Finally, the weights are calibrated to align with the population benchmarks in the accompanying table to correct for nonresponse to recruitment surveys and panel attrition. If only a subsample of panelists are invited to participate in the wave, this weight is adjusted to account for any differential probabilities of selection.

American Trends Panel weighting dimensions

Variable	Benchmark source
Age (detailed)	2021 American Community Survey (ACS)
Age x Gender	
Education x Gender	
Education x Age	
Race/Ethnicity x Education	
Born inside vs. outside the U.S. among Hispanics and Asian Americans	
Years lived in the U.S.	
Census region x Metro/Non-metro	2021 CPS March Supplement
Volunteerism	2021 CPS Volunteering & Civic Life Supplement
Voter registration	2021 CPS Voting and Registration Supplement
Party affiliation	2022 National Public Opinion Reference Survey (NPORS)
Frequency of internet use	
Religious affiliation	
<i>Additional weighting dimensions applied within Black adults</i>	
Age	2021 American Community Survey (ACS)
Gender	
Education	
Hispanic ethnicity	
Voter registration	2018 CPS Voting and Registration Supplement
Party affiliation	2022 National Public Opinion Reference Survey (NPORS)
Religious affiliation	

Note: Estimates from the ACS are based on non-institutionalized adults. Voter registration is calculated using procedures from Hur, Achen (2013) and rescaled to include the total U.S. adult population.

PEW RESEARCH CENTER

Among the panelists who completed the survey, this weight is then calibrated again to align with the population benchmarks identified in the accompanying table and trimmed at the 1st and 99th percentiles to reduce the loss in precision stemming from variance in the weights. Sampling errors and tests of statistical significance take into account the effect of weighting.

The following table shows the unweighted sample sizes and the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey.

Sample sizes and margins of error, ATP Wave 124

Group	Unweighted sample size	Plus or minus ...
Total sample	3,576	2.0 percentage points
Half sample	At least 1,776	2.9 percentage points
Rep/Lean Rep	1,491	3.0 percentage points
Half sample	At least 690	4.4 percentage points
Dem/Lean Dem	1,930	2.9 percentage points
Half sample	At least 922	4.2 percentage points

Note: This survey includes oversamples of Hispanic men, non-Hispanic Black men and non-Hispanic Asian adults. Unweighted sample sizes do not account for the sample design or weighting and do not describe a group's contribution to weighted estimates. See the Sample design and Weighting sections above for details.

PEW RESEARCH CENTER

Sample sizes and sampling errors for other subgroups are available upon request. In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

Dispositions and response rates

Final dispositions, ATP Wave 124

	AAPOR code	Total
Completed interview	1.1	3,576
Logged on to survey; broke off	2.12	53
Logged on to survey; did not complete any items	2.1121	16
Never logged on (implicit refusal)	2.11	405
Survey completed after close of the field period	2.27	0
Completed interview but was removed for data quality		8

PEW RESEARCH CENTER

Cumulative response rate as of ATP Wave 124

	Total
Weighted response rate to recruitment surveys	12%
% of recruitment survey respondents who agreed to join the panel, among those invited	71%
% of those agreeing to join who were active panelists at start of Wave 124	49%
Response rate to Wave 124 survey	88%
Cumulative response rate	4%

PEW RESEARCH CENTER

Topline questionnaire

Pew Research Center
Spring 2023 Global Attitudes Survey
February 28, 2024 Release

Methodological notes:

- Survey results are based on national samples. For further details on sample designs, see Methodology section and our [international survey methods database](#).
- Due to rounding, percentages may not total 100%. The topline “total” columns show 100%, because they are based on unrounded numbers.
- Surveys in the U.S. and Australia were conducted online. The U.S. survey was conducted on Pew Research Center’s American Trends Panel. The Australia survey was conducted on the Social Research Centre’s Life in Australia Panel. In both countries, many questions have been asked in previous surveys on the phone. Phone trends for comparison are provided in separate tables throughout the topline. The extent of the mode differences varies across questions; while there are negligible differences on some questions, others have more pronounced differences. Caution should be taken when evaluating online and phone estimates.
- Since 2020, the Italy survey has been conducted by telephone; surveys were conducted face-to-face in 2002 and 2007-2019.
- Since 2021, the Greece survey has been conducted by telephone; all prior surveys in Greece were conducted face-to-face.
- Not all questions included in the Spring 2023 Global Attitudes Survey are presented in this topline. Omitted questions have either been previously released or will be released in future reports.

		Q2. How satisfied are you with the way democracy is working in (survey country) – very satisfied, somewhat satisfied, not too satisfied, or not at all satisfied?
