

Appendix F: Results by country

This PDF shows the results for each of the 198 countries and territories on the 20 questions that comprise the Pew Research Center’s Government Restrictions Index (GRI) and the 13 questions that comprise the Social Hostilities Index (SHI).

Although each question is weighted equally, many of the questions contain gradations, allowing partial scores depending on intensity or severity. For example, on SHI Question No. 2 – “Was there mob violence related to religion?” – a country that had no religion-related mob violence would receive 0 points, a country that had mob violence in which no deaths were reported would receive 1/2 point (0.50), and a country that had mob violence in which deaths were reported would receive a full point (1.00).

The scores are presented for three years: the latest year, ending Dec. 31, 2018; the previous year, ending Dec. 31, 2017; and the baseline year, ending in mid-2007 (July 1, 2006 through June 30, 2007). Scores for the years ending in mid-2008, mid-2009, mid-2010 and December 2011 are not presented due to space constraints.

Both the GRI and the SHI are scales of 0 to 10. Readers wishing to independently calculate a country’s index score from the tables should note that the sum of a country’s scores on all 20 GRI questions must be divided by two and the sum total of its scores on all 13 SHI questions must be multiplied by 10/13 (0.77) to convert them to the 10-point scale. For more detail on the indexes, see the Methodology.

Starting with 2017 data, the calculation for SHI Question No. 1 – “Were there crimes, malicious acts or violence motivated by religious hatred or bias?” – was updated. See Methodology for details.

Article 18 states: "Everyone has the right to freedom of thought, conscience and religion; this right includes freedom to change his religion or belief, and freedom, either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship and observance."

Note: This report corrects the way constitutions were coded for 10 countries: Cameroon, Costa Rica, the Dominican Republic, Fiji, Iran, Jamaica, Kenya, Mexico, Mozambique and Uruguay. The corrections were applied to all applicable previous years to ensure consistency, and the updates resulted in changes to some of those countries' GRI.Q.1 scores in various years.

Does the constitution or basic law include stipulations that appear to qualify or substantially contradict the concept of “religious freedom”?

- 0 points 0.00 No
- 1/3 point 0.33 Yes, there is a qualification
- 2/3 point 0.67 Yes, there is a substantial contradiction and only some religious practices are protected
- Full point 1.00 Religious freedom is not provided in the first place

This is a summary variable that captures the hostilities identified in questions SHI.Q.1a-f into a single measure indicating the severity of religious hatred or bias in each country. Countries can have multiple types of hostilities. A country receives 1/6 point for each type of hostility that occurred that year. For SHI.Q.1a the country could receive 0.5/6 point or 1/6 point. The scores on this question are cumulative; a country with two types of malicious acts could score 0.33 for that period and a country with all six types in a year could score 1.00. Starting with 2017 data, there has been an update in calculating SHI.Q.1 to account for limited (0.5 point) and widespread (1 point) harassment or intimidation (in SHI.Q.1a). See Methodology for more information.
