## Methodology

The analysis in this report is based on telephone interviews conducted Jan. 25-Feb. 8, 2021, among a national sample of 1,502 adults, 18 years of age or older, living in all 50 U.S. states and the District of Columbia (300 respondents were interviewed on a landline telephone, and 1,202 were interviewed on a cellphone, including 845 who had no landline telephone). The survey was conducted by interviewers under the direction of Abt Associates. A combination of landline and cellphone random-digit-dial samples were used; both samples were provided by Dynata according to Abt Associates specifications. Interviews were conducted in English and Spanish. Respondents in the landline sample were selected by randomly asking for the youngest adult male or female who is now at home. Interviews in the cell sample were conducted with the person who answered the phone, if that person was an adult 18 years of age or older. For detailed information about our survey methodology, see: https://www.pewresearch.org/methodology/u-s-survey-research/

The combined landline and cellphone sample is weighted using an iterative technique that matches gender, age, education, race, Hispanic origin and nativity and region to parameters from the U.S. Census Bureau's 2019 American Community Survey one-year estimates and population density to parameters from the decennial census. The sample also is weighted to match current patterns of telephone status (landline only, cellphone only, or both landline and cellphone), based on extrapolations from the 2019 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size among respondents with a landline phone. The margins of error reported and statistical tests of significance are adjusted to account for the survey's design effect, a measure of how much efficiency is lost from the weighting procedures.

The following table shows the unweighted sample sizes and the error attributable to sampling that would be expected at the $95 \%$ level of confidence for different groups in the survey:

| Group | Unweighted <br> sample size <br> 1,502 | Plus or minus ... <br> Total sample |
| :--- | :---: | :---: |
|  3.9 percentage points |  |  |
| High school or less <br> Some college <br> College + | 400 | 5.4 percentage points |
|  | 705 | 5.5 percentage points |
| Less than $\$ 30 \mathrm{~K}$ | 279 | 4.1 percentage points |
| $\$ 30 \mathrm{~K}-\$ 74,999$ | 391 | 6.6 percentage points |
| $\$ 75 \mathrm{~K}$ or more | 603 | 5.7 percentage points |

Sample sizes and sampling errors for other subgroups are available upon request.
In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

Pew Research Center undertakes all polling activity, including calls to mobile telephone numbers, in compliance with the Telephone Consumer Protection Act and other applicable laws.

Pew Research Center is a nonprofit, tax-exempt 501(c)(3) organization and a subsidiary of The Pew Charitable Trusts, its primary funder.

## January 2021 Core Trends Survey Topline

Abt Associates for Pew Research Center

Sample: $\mathrm{n}=1,502$ U.S. adults age 18 or older nationwide, including 1,202 cellphone interviews
Interviewing dates: January 25, 2021 - February 8, 2021
Margin of error: $\pm 2.9$ percentage points for results based on Total $[n=1,502]$
NOTE: ALL NUMBERS ARE PERCENTAGES UNLESS OTHERWISE NOTED. ROWS/COLUMNS MAY NOT TOTAL 100\% DUE TO ROUNDING. PERCENTAGES LESS THAN 0.5\% ARE REPLACED BY AN ASTERISK (*). IF NO ONE ANSWERED THE QUESTION, THE CELL CONTAINS ZERO (0). A DOUBLE HYPHEN (--) INDICATES THAT THE RESPONSE OPTION WAS NOT PRESENT IN THAT SURVEY.

THE QUESTIONS PRESENTED BELOW ARE PART OF A LARGER SURVEY CONDUCTED ON THE AMERICAN TRENDS PANEL. OTHER QUESTIONS ON THIS SURVEY HAVE BEEN PREVIOUSLY RELEASED OR HELD FOR FUTURE RELEASE.

воокs1 During the past 12 months, about how many BOOKS did you read either all or part of the way through? Please include any print, electronic, or audiobooks you may have read or listened to. ${ }^{1}$

[^0]
[^0]:    ${ }^{1}$ The surveys with an asterisk (*) originally included 16 - and 17 -year-olds in their samples, while all other surveys were exclusively conducted among adults ages 18 and older. In some prior PewResearch Center publications, findingsf rom the asterisked surveys inclu ded those under age 18. In thistable, results have been recalculated to only include adults ages 18 and older on all surveys to enable comparisons.
