

Pew Global Attitudes Project
2011 Spring Survey Topline Results
August 23, 2011 Release

Methodological notes:

- Survey results are based on national samples except in China. For further details on sample designs, see Methodological Appendix.
- Due to rounding, percentages may not total 100%. The topline “total” columns show 100%, because they are based on unrounded numbers.
- Since 2007, the Global Attitudes Project has used an automated process to generate topline. As a result, numbers may differ slightly from those published prior to 2007.
- Previous trends from India are not shown because those results were based on less-representative samples of the population, while the 2011 sample is more representative of the Indian population.
- Not all questions included in the Spring 2011 survey are presented in this topline. Omitted questions have either been previously released or will be released in future reports.

		Q86 In general, do you think (survey country) parents put too much pressure on their children to do well in school, not enough pressure, or about the right amount of pressure?				Total
