# About Pew Research Center's Global Attitudes Project

Pew Research Center is a nonpartisan fact tank that informs the public about the issues, attitudes and trends shaping America and the world. It does not take policy positions. Its Global Attitudes Project conducts public opinion surveys around the world on a broad array of subjects ranging from people's assessments of their own lives to their views about the current state of the world and important issues of the day. Since 2001, the project has conducted more than 330,000 interviews in 60 nations.

Staff members who contributed to the 2013 survey include:

## Saudi Arabia's Image Falters among Middle East Neighbors

Mixed Views of Saudi Influence, Record on Civic Freedoms

Each year, the world is reminded of Saudi Arabia's influential status as the birthplace of Islam, as hundreds of thousands of Muslims from across the globe make the Hajj, or pilgrimage, to the city of Mecca. Perhaps owing to its pivotal role within the Islamic faith, Saudi Arabia tends to be viewed favorably in countries that are home to large or majority-Muslim populations.

However, a Pew Research Center survey reveals that Saudi Arabia's standing has slipped substantially among key Middle Eastern publics, including in Lebanon where favorable opinion has plummeted 31

## Declining Support For Saudi Arabia in Middle East

percentage points since 2007. In contrast, opinion of Saudi Arabia has not soured in other predominately Muslim countries outside of the region.

The reasons for Saudi Arabia's worsening image in the Middle East are likely multiple. Criticism of the influence the Saudis wield in the Middle East is significant in Lebanon, Tunisia and Turkey. And substantial disapproval of the Saudi government's track record on protecting the personal freedoms of its citizens is evident in Turkey, Lebanon, the Palestinian territories and Tunisia, as it is in much of the world.

Saudi Arabia is viewed favorably in many countries outside the Middle East where Muslims make up a substantial percentage, if not a majority, of the population. In Pakistan, for example, 95% express a favorable opinion of the Saudi kingdom, while more than six-in-ten in Indonesia, Senegal and Malaysia share this view. However, among its Muslim neighbors, opinions of Saudi Arabia are more varied. Only in Jordan and Egypt is opinion of the desert kingdom overwhelmingly positive (88% and 78%, respectively). Elsewhere in the Middle East, views are mixed or even decidedly negative, as in the case of Turkey (26% favorable vs. 53% unfavorable).

Moreover, in four of the five Middle Eastern countries surveyed in both 2007 and 2013, Saudi Arabia's image has substantially worsened. The most dramatic decline has occurred in Lebanon, where overall opinion of the Saudi kingdom has fallen from 82% to 51% favorable over the past six years, and the drop is particularly prevalent among Lebanese Shia. Smaller, but significant drops in Saudi Arabia's standing are evident in Turkey (- 14 percentage points), the Palestinian territories (-13) and Egypt (-13).

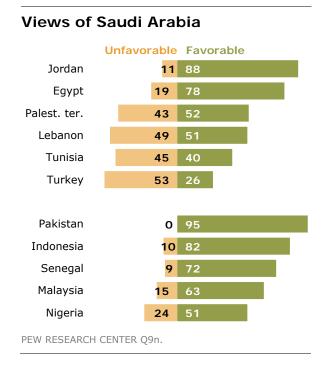

These are among the key findings from a Pew Research Center survey conducted in 39 countries among 37,653 respondents from March 2 to May 1, 2013. The poll also finds varied assessments of Saudi influence in the Middle East. Among those who do see significant Saudi influence within their borders, views are mixed as to whether this is a good thing or bad thing. More stark are assessments of Saudi Arabia's track record on personal freedoms. Among the countries surveyed in the Middle East and elsewhere, only in Jordan, Egypt, Pakistan and Senegal do clear majorities say the Saudi kingdom does a good job of protecting civil liberties.

#### Saudi Arabia's Image Abroad

In the Middle East, overall opinion of Saudi Arabia varies widely, while in countries outside the region that have large or majority Muslim populations, views are generally positive.

Among its neighbors, Saudi Arabia is viewed favorably by clear majorities in Jordan (88%) and Egypt (78%). Only about half of Palestinians (52%) have a favorable opinion of the desert kingdom, although positive views are more prevalent in the Hamas-controlled Gaza Strip (58% favorable vs. 40% unfavorable) than the Fatah-dominated West Bank (48% vs. 45%).

Opinion of Saudi Arabia is nearly evenly split in Lebanon, where 51% see their neighbor in a positive light and 49% see it negatively. Again, religious differences are evident, with roughly eight-in-ten Lebanese Sunni Muslims (82%) expressing a favorable view of the Saudi kingdom, compared with just 6% of Lebanese

Shia. Lebanese Christians occupy the middle ground, with 52% favorable and 48% unfavorable toward Saudi Arabia.

Tunisians are also divided, with 40% holding a favorable view of Saudi Arabia, and 45% holding a negative view. Turkey, which is not only a regional neighbor but a fellow G20 member, is the only country polled where as many as half (53%) see the Saudi kingdom in a negative light.

Outside the Middle East, in the other publics polled where Muslims make up a substantial portion of the population, half or more have a favorable view of Saudi Arabia. Pakistanis show the most support for the desert kingdom, with 95% holding a favorable opinion and none expressing an unfavorable view. Majorities in Indonesia (82%), Senegal (72%), and Malaysia (63%) also view the kingdom favorably. In Nigeria, 51% hold a positive view of Saudi Arabia.

While opinion of Saudi Arabia is on balance positive in the Middle East, favorable ratings from important allies, such as Egypt and the Palestinian territories have deteriorated since 2007 (-13 percentage points). And in Turkey, while 26% have a positive view of Saudi Arabia in 2013, this is down from 40% who said the same in 2007 (-14 percentage points).

However, the drop in support from Lebanon is even steeper. In 2007, 82% of the Lebanese public had a favorable view of the Saudi kingdom, but that has plummeted 31 percentage points, to just 51% today. The drop is especially pronounced among Lebanese Christians (-38 percentage points) and Shia Muslims (-57 percentage points).

#### Sectarian and Regional Views of Saudi Arabia

	Fav	Unfav	DK
	%	%	%
Palest. ter.	52	43	5
West Bank	48	45	6
Gaza	58	40	2
Lebanon	51	49	1
Christian	52	48	0
Sunni	82	16	2
Shia	6	93	1
PEW RESEARCH	CENT	ER Q9n.	

## Positive Views of Saudi Arabia Down in Region

		% Fav	orable		
	2007	2008	2012	2013	07-13 Change
					change
	%	%	%	%	
Lebanon	82	69	50	51	-31
Turkey	40	36	23	26	-14
Egypt	91	84	81	78	-13
Palest. ter.	65			52	-13
Jordan	90	91	90	88	-2
Tunisia			40	40	
Indonesia	86	81		82	-4
Malaysia	63			63	0
Pakistan	87	97	95	95	+8
Nigeria				51	
Senegal				72	
PEW RESEAR	CH CENT	ER Q9n.			

Despite declines in those key countries, views of Saudi Arabia are basically unchanged in Jordan, Indonesia, and Malaysia since 2007. Moreover, favorable opinions have risen in one country – Pakistan (up 8 percentage points).

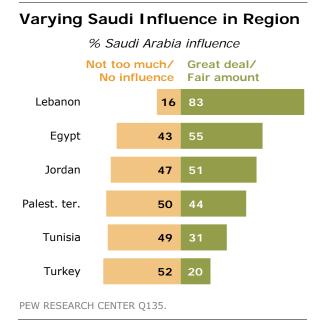

#### Middle East Views of Saudi Influence

Publics in the Middle East are divided when it comes to the degree of influence that Saudi Arabia wields in their country. A clear majority in Lebanon (83%) says that Saudi Arabia has a great deal or fair amount of influence on the direction of their country, but other publics in the region are not as convinced.

In Egypt (55%) and Jordan (51%), half or more say Saudi Arabia exerts significant influence on how things are going in their country, compared with even fewer who say the same in the Palestinian territories (44%), Tunisia (31%), and Turkey (20%).

In Lebanon, among the overwhelming majority who see Saudi Arabia as a major influence on their country, only 43% say this is a good thing, while 48% say it is a bad thing. However, behind these numbers is a sharp sectarian divide: Lebanese Shia who perceive Saudi Arabia reaching into their country overwhelmingly say this is a bad thing (87%), compared with 71% of Lebanese Sunnis who see – and welcome – Saudi influence. Lebanese Christians are more evenly divided (40% good thing vs. 47% bad thing).

In Jordan (67%), Egypt (63%), and the Palestinian territories (61%), six-in-ten or more among those who perceive significant

#### Views of Saudi Influence in the Middle East

	Great deal/Fair amount of Saudi influence	Is influe	ence a*
		Bad thing	Good thing
	%	%	%
Lebanon	83	48	43
Christian	86	47	40
Sunni	83	22	71
Shia	77	87	8
Egypt	55	7	63
Jordan	51	8	67
Palest. ter.	44	22	61
Tunisia	31	62	26
Turkey	20	66	19

\* Based on those saying Saudi Arabia has "great deal" or "fair amount" of influence on country.

PEW RESEARCH CENTER Q135 & Q136.

Saudi influence in their country say this is a good thing. By contrast, among the minority in Turkey and Tunisia who see Saudi Arabia extending its reach across their border, majorities (66% and 62%, respectively) think this is a bad thing.

#### Saudi Record on Personal Freedoms

In the Middle East, Saudi Arabia receives mixed marks when it comes to respecting the rights of its citizens. Only in Jordan (60%) and Egypt (59%) do clear majorities say the Saudi government protects the personal freedoms of its people. Elsewhere in the region, half or more take the opposite view.

However, in countries outside the Middle East that are home to substantial or majority Muslim populations, Saudi Arabia is generally given credit for protecting the liberties of its citizens. Half or more in Pakistan (65%), Senegal (63%), Nigeria (55%), and Indonesia (52%) say the Saudi regime protects personal freedoms within its borders.

By contrast, opinion of Saudi Arabia's record on civil rights is highly critical in Europe, where as many as eight-in-ten or more in Spain (86%), Greece (84%), and France (81%) think the Saudi government does not protect the personal freedoms of its people. In North America, 74% of Canadians and 72% of Americans agree, as do 71% of Israelis.

Opinion is more mixed in Asia and Latin America, but nowhere in those regions does a clear plurality give Saudi Arabia's track record on civil liberties favorable marks.

#### No Yes Jordan 34 60 Egypt 31 59 Palest. ter. 53 37 Tunisia 50 24 Lebanon 23 71 64 11 Turkey Israel 71 17 Pakistan 7 65 Senegal 10 63 Nigeria 13 55 Indonesia 35 52 Malaysia 22 46 U.S. 72 11 Canada 74 6 Russia 33 28 France 81 18 Czech Rep. 63 14 Germany 75 13 Britain 69 12 Poland 66 11 Italv 77 6 Spain 86 6 Greece 84 5 Philippines 48 45 China 37 27 S. PEW RESEARCH CENTER Q127d.

### Personal Freedoms in Saudi Arabia Do you think the government of Saudi Arabia respects the personal freedoms of its people?

Overall, across 39 countries surveyed in 2013 – including those polled in the Middle East – a median of just 18% thinks the Saudi government respects the personal freedoms of its people. By comparison, a global median of 70% say the U.S. respects the human rights of its people.<sup>1</sup>

## **Survey Methods**

### About the 2013 Spring Pew Global Attitudes Survey

Results for the survey are based on telephone and face-to-face interviews conducted under the direction of Princeton Survey Research Associates International. Survey results are based on national samples. For further details on sample designs, see below.

The descriptions below show the margin of sampling error based on all interviews conducted in that country. For results based on the full sample in a given country, one can say with 95% confidence that the error attributable to sampling and other random effects is plus or minus the margin of error. In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

Adult population

Representative:

Country: Sample design: Mode: Languages: Fieldwork dates: Sample size: Margin of Error: Representative:	South Africa Multi-stage cluster sample stratified by metropolitan area, province and urbanity Face-to-face adults 18 plus English, Zulu, Xhosa, South Sotho, Afrikaans March 18 – April 12, 2013 815 ±4.1 percentage points Adult population
Country: Sample design: Mode:	<b>South Korea</b> Random Digit Dial (RDD) probability sample of adults who own a cell phone Telephone adults 18 plus
Languages:	Korean
Fieldwork dates:	March 4 – March 18, 2013
Sample size:	809
Margin of Error:	±3.7 percentage points
Representative:	Adults who own a cell phone (roughly 96% of adults age 18 and older)
Country: Sample design: Mode: Languages: Fieldwork dates: Sample size:	<b>Spain</b> Random Digit Dial (RDD) probability sample of landline and cell phone- only households stratified by region Telephone adults 18 plus Spanish/Castilian March 4 – March 15, 2013 1,000
Margin of Error:	±3.1 percentage points
Representative:	Telephone households (roughly 97% of Spanish households)
Country:	<b>Tunisia</b>
Sample design:	Multi-stage cluster sample stratified by governorate and urbanity
Mode:	Face-to-face adults 18 plus
Languages:	Tunisian Arabic
Fieldwork dates:	March 4 – March 19, 2013
Sample size:	1,000
Margin of Error:	±4.0 percentage points
Representative:	Adult population

Country:	Turkey
Sample design:	Multi-stage cluster sample stratified by the 26 regions (based on
	geographical location and level of development (NUTS 2)) and urbanity
Mode:	Face-to-face adults 18 plus
Languages:	Turkish
Fieldwork dates:	March 5 – March 24, 2013
Sample size:	1,000
Margin of Error:	±7.7 percentage points
Representative:	Adult population
Country:	Uganda
Sample design:	Multi-stage cluster sample stratified by region and urbanity
Mode:	Face-to-face adults 18 plus
Languages:	Luganda, English, Runyankole/Rukiga, Luo, Runyoro/Rutoro, Ateso,
	Lugbara
Fieldwork dates:	March 15 – March 29, 2013
Sample size:	800
Margin of Error:	±4.3 percentage points
Representative:	Adult population
Country:	United States
Sample design:	Random Digit Dial (RDD) probability sample of landline and cell phone
	households stratified by county
Mode:	Telephone adults 18 plus
Languages:	English, Spanish
Fieldwork dates:	March 4 – March 18, 2013
Sample size:	1,002
Margin of Error:	±3.5 percentage points
Representative:	Telephone households with English or Spanish speakers (roughly 97% of
	U.S. households)

Country:	Venezuela
Sample design:	Multi-stage cluster sample stratified by region and parish size
Mode:	Face-to-face adults 18 plus
Languages:	Spanish
Fieldwork dates:	March 15 – April 27, 2013
Sample size:	1,000
Margin of Error:	±3.5 percentage points
Representative:	Adult population (excluding remote areas, or about 4% of population)

## Pew Research Center's Global Attitudes Project 2013 Spring Survey Topline Results October 17, 2013 Release

Methodological notes:

- Survey results are based on national samples. For further details on sample designs, see Survey Methods section.
- Due to rounding, percentages may not total 100%. The topline "total" columns show 100%, because they are based on unrounded numbers.
- For some countries, trends for certain years are omitted due to differences in sample design or population coverage. Omitted trends often reflect less representative samples than more recent surveys in the same countries. Trends that are omitted include:
  - Brazil prior to 2010
  - Nigeria prior to 2010
- Not all questions included in the Spring 2013 survey are presented in this topline. Omitted questions have either been previously released or will be released in future reports.

		Q9n Please tell me if you have a very favorable, somewhat favorable, somewhat unfavorable or very unfavorable opinion of: n. Saudi Arabia
