## Christie's Image Turns More Negative Most Don't Believe His Assertions on Highway Controversy

Chris Christie's public image today is starkly different than it was a year ago. Last January, following Christie's visible role in Hurricane Sandy relief efforts, favorable opinions outnumbered unfavorable ones by more than two-to-one. Today, in the wake of a scandal involving highway lane closures that led to massive traffic jams in northern New Jersey, nearly as many offer an unfavorable assessment of Christie as a favorable one.

Christie's explanation of his role in the highway lane closure is drawing skepticism. Most of those who have heard about the controversy do not believe Christie's assertion that he was not aware of his aides' involvement in the lane closure.

The national survey by the Pew Research Center and USA TODAY, conducted Jan. 15-19 among 1,504 adults finds that $38 \%$ have a favorable impression of Christie while $34 \%$ have an unfavorable view; $28 \%$ offer no opinion of the New Jersey governor. Unfavorable views of Christie have doubled since last January from $17 \%$ to $34 \%$ - as more people now offer an opinion of Christie. Favorable views of Christie are largely unchanged from last January ( $38 \%$ now, $40 \%$ then).

## Unfavorable Views of Christie Have Doubled Since Last January <br> Opinion of Chris Christie ...

*Based on those who heard a lot/little about Christie's aides ordering closure of highway lanes ( $72 \%$ of the public). Figures may not add to $100 \%$ because of rounding.
PEW RESEARCH CENTER/USA TODAY

Most Americans say they have heard either a lot (45\%) or a little (28\%) about Christie's aides ordering the closure of highway traffic lanes last year, which resulted in major traffic jams in northern New Jersey. Among those who have heard about the incident, $58 \%$ say they do not believe Christie when he said he had no knowledge of his aides'
involvement until it became public; 32\% say they believe Christie's assertion that he was unaware of his aides' role.

Majorities of Democrats (67\%) and independents (60\%) who heard at least a little about Christie's aides ordering the lane closure do not believe Christie's statement that he had no knowledge of his aides' involvement. About half of Republicans (48\%) believe Christie's assertions while 42\% do not. There are no significant partisan differences in awareness of Christie's aides ordering the lane closure.

A survey last week, conducted a few days after a press conference in which Christie apologized for the lane closure, found that just $18 \%$ tracked news of the apology very closely. At that time, $60 \%$ said their opinion of Christie "in the past few days" had not changed.

## Unfavorable Views of Christie Rise

Compared with last January, unfavorable opinions of Christie are higher across most demographic and partisan groups. The balance of opinion toward Christie is now negative among Democrats ( $32 \%$ favorable, $43 \%$ unfavorable), while independents' views are divided ( $37 \%$ favorable, $33 \%$ unfavorable). In January 2013, 37\% of Democrats and independents viewed him favorably, while just $18 \%$ and $15 \%$, respectively, had an unfavorable impression.
$\left.\begin{array}{lccccc}\text { Changing Views of Chris Christie } & \\ & \text { Jan 2013 } & \text { Jan 2014 } & \begin{array}{c}\text { Change } \\ \text { in unfav }\end{array} \\ & \text { Fav } & \text { Unfav } & \text { Fav } & \text { Unfav }\end{array}\right)$

Survey conducted Jan 15-19, 2014. Don't know responses not shown.
PEW RESEARCH CENTER/USA TODAY

However, Republicans still view Christie favorably by $49 \%$ to $27 \%$. That is only modestly changed from last January, when an identical percentage (49\%) viewed Christie favorably and $20 \%$ had a negative opinion.

In July, the Pew Research Center conducted a special poll of Republicans and Republican
leaners, which included favorability measures for Christie and some other leading GOP
figures. Thus, it is possible to track changes in views of Christie among the GOP base across three points over the past year.

Notably, unfavorable opinions of Christie among Republicans and GOP leaners who agree with the Tea Party rose 13 points between January and July, from $22 \%$ to $35 \%$. Since then, however, there has been virtually no change in opinions about Christie. Currently, $51 \%$ of Tea Party Republicans have a favorable impression of Christie while $36 \%$ view him unfavorably.

Opinions of Christie among non-Tea Party Republicans show little change from either July

## Views of Christie among GOP Base Little Changed Since July

Republican leaners $(N=624)$. Don't know response not shown.
PEW RESEARCH CENTER/USA TODAY or January. Currently, $47 \%$ of non-Tea Party Republicans view Christie favorably while $25 \%$ view him unfavorably.

## About the Survey

The analysis in this report is based on telephone interviews conducted January 15-19, 2014 among a national sample of 1,504 adults, 18 years of age or older, living in all 50 U.S. states and the District of Columbia ( 602 respondents were interviewed on a landline telephone, and 902 were interviewed on a cell phone, including 487 who had no landline telephone). The survey was conducted by interviewers at Princeton Data Source under the direction of Princeton Survey Research Associates International. A combination of landline and cell phone random digit dial samples were used; both samples were provided by Survey Sampling International. Interviews were conducted in English and Spanish. Respondents in the landline sample were selected by randomly asking for the youngest adult male or female who is now at home. Interviews in the cell sample were conducted with the person who answered the phone, if that person was an adult 18 years of age or older. For detailed information about our survey methodology, see http://peoplepress.org/methodology/

The combined landline and cell phone sample are weighted using an iterative technique that matches gender, age, education, race, Hispanic origin and nativity and region to parameters from the 2012 Census Bureau's American Community Survey and population density to parameters from the Decennial Census. The sample also is weighted to match current patterns of telephone status and relative usage of landline and cell phones (for those with both), based on extrapolations from the 2013 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size among respondents with a landline phone. Sampling errors and statistical tests of significance take into account the effect of weighting.

The following table shows the unweighted sample sizes and the error attributable to sampling that would be expected at the $95 \%$ level of confidence for different groups in the survey:

| Group | Unweighted sample size | Plus or minus ... |
| :---: | :---: | :---: |
| Total sample | 1,504 | 2.9 percentage points |
| Republican | 354 | 6.0 percentage points |
| Democrat | 477 | 5.2 percentage points |
| Independent | 587 | 4.7 percentage points |
| Based on those who heard a lot/little about Christie's aides ordering closure of highway lanes |  |  |
| Sample | 1,171 | 3.3 percentage points |
| Republican | 281 | 6.7 percentage points |
| Democrat | 394 | 5.7 percentage points |
| Independent | 439 | 5.4 percentage points |

Sample sizes and sampling errors for other subgroups are available upon request. In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

[^0]TEAPARTY3 CONTINUED...

May 20-23, 2010
Mar 11-21, 2010

Key to Pew Research trends noted in the topline:
(U)

Pew Research Center/USA Today polls

[^0]:    1 In the February 2-7, 2011, survey and before, question read "...do you strongly agree, agree, disagree or strongly disagree with the Tea Party movement..." In October 2010 and earlier, question was asked only of those who had heard or read a lot or a little about the Tea Party. In May 2010 through October 2010, it was described as: "the Tea Party movement that has been involved in campaigns and protests in the U.S. over the past year." In March 2010 it was described as "the Tea Party protests that have taken place in the U.S. over the past year."
