A Year After Columbine

Public Looks to Parents More Than Schools to Prevent Violence

A year after the massacre at Colorado's Columbine High School, the vast majority of the public believes it is the responsibility of parents to ensure that such tragedies are not repeated. In fact, a plurality identifies poor parenting — not peer pressure or violence in the media — as the primary cause for school shootings, like the one at Columbine. Americans continue to support gun control, with nearly two-thirds saying such restrictions are more important than the rights of gun owners. But tougher gun laws are not regarded as a panacea, and just 6% believe such laws would prevent a recurrence of incidents like the one at Columbine.

The shootings at that suburban Denver high school continue to shape the way parents and non-parents alike view the issue of school violence. About seven-in-ten (71%) parents say the violence at Columbine has had at least some impact on their feelings about the safety of their children at school. And whether or not they have children, Americans overwhelmingly agree that parents are best able to prevent future Columbines. More than eight-in-ten (85%) place this responsibility on the shoulders of parents, against just 9% who say it rests with the schools.

Overall, parents express concern about their children's safety at school. Only 40% believe their children are *very* safe at school, and more than one-third (37%) say schools that their children attend have upgraded security in the past year. Fully 17% of parents report there have been serious threats of violence at those schools.

The latest Pew Research Center survey of 1,000 adults, including 283 parents, found that attitudes on gun control have generally remained unchanged in the year since the Columbine violence. By a solid 66%-to-29% majority, the

public says controlling gun ownership is more important than protecting the right of Americans to

own guns. This is similar to the 65% majority found in May 1999, in the immediate aftermath of Columbine. There also has been only slight movement on the question of whether to ban handguns. Currently, Americans are evenly split — 47% favor such a ban and 47% are opposed. In May 1999, 44% supported the ban and 50% were opposed.

It is clear that for many Americans gun control is but one remedy — and perhaps not even the most effective remedy — for preventing violence. While 41% believe that stricter gun laws would reduce violent crime by a great deal, 63% say that more jobs and community programs for young people would accomplish that objective. And a majority of the public (59%) says it is more important to enforce *existing* gun laws than to enact new statutes aimed at restricting weapons sales and improving gun safety.

The public's ambivalence on gun-related questions is reflected in divisions over which party is better suited to handle this issue. Overall, Democrats hold a slight 36%-30% lead as doing a better job on gun control, but more than one-third of the public (34%) has no preference. The Democrats' advantage on this issue has not changed significantly since last June, when they held a 42%-34% lead.

More Scrutiny of Troubled Youth

Asked about specific remedies for school violence, many Americans say more attention should be paid to children with anti-social attitudes. Fully six-in-ten believe that giving such children closer scrutiny would be more of an effective way to prevent shooting incidents than increasing school security (11%), passing stricter gun control laws (6%) or reducing violence in popular entertainment (13%).

Support for greater vigilance of this sort has grown in the past year; in April 1999, shortly after the Columbine incident, 49% endorsed paying more attention to kids' anti-social attitudes and behaviors, 21% cited increasing school security, and 11% cited passing stricter gun control laws.

Attitudes have also changed in the last year on why such violent incidents occur. More than four in ten (42%) lay the blame on parents, compared to 36% in April 1999. One-quarter of the public (26%) cites violence in the media that children are exposed to, a decrease of eight percentage points from April 1999.

Overall, parents are split on what *they* think is the main reason why kids commit such violent acts — 35% think it is poor upbringing by parents, and 33% say it is the violence in the media that children are exposed to. Mothers and fathers also differ on this issue. Almost half of the fathers surveyed (46%) cite poor upbringing, compared to only one quarter (25%) of mothers. More than four-in-ten of the mothers (41%), on the other hand, point the finger at violence in the media. Relatively few parents attribute acts of violence to peer pressure (15%) or genetic or biological tendencies toward violence (3%).

Why Kids Commit Violence						
	<u>Total</u>	Moms	Dads

Genetic / biological tendencie	s 4	4	2			
Other	7	7	7			
Don't know	7	7	6			
	100	100	100			

The effects of Columbine are still being felt by parents and children in a number of ways. Only 40% of parents think their child is very safe at school, while five out of ten parents think their child is somewhat safe. One-third (34%) of parents say their child seems concerned about personal safety at school. More parents of schoolchildren age 12 to 17 (45%) report their child being concerned than do parents of schoolchildren age five to 11 (26%). Similarly, more parents of older children (25%) also report that they've heard of serious threats of violence involving children at their child's school, compared to only 10% of parents with younger children.

Almost four-in-ten parents (37%) report that their child's school has taken measures to ensure safety in the past year, like installing metal detectors, closed circuit TV cameras or hiring police or security guards. More parents of children age 12 to 17 say this occurs than parents of children age five to 11 (44%-30%).

The school shootings remain an important topic of conversation between parents and children. More than three-quarters (77%) of all parents and 85% of parents of children age 12-17 say they have had at least some discussion about school shootings with their children. In contrast, 41% of all parents have talked to their children about the case of Elian Gonzalez, the 6-year-old Cuban boy at the center of an international custody battle, and 33% have discussed the 2000 presidential election campaign.

Gender Gap Remains

While support for gun control is strong across all major demographic groups, a gender gap persists on this issue. Women favor controlling gun ownership over protecting the rights of gun owners by an overwhelming 73%-to-22% margin. On balance, men share this view, though by a narrower margin — 59%-36%. The partisan divide is even more pronounced. A 77% majority of Democrats back gun control, compared to a bare majority (55%) of Republicans.

Voters are less inclined this year than last to punish members of Congress who oppose gun control. In July 1999, fully 55% said a member of Congress who voted against gun control should *not* be reelected, while 35% said such a member would deserve reelection. Today the voting public is much more evenly divided: 41% say members who oppose gun control should not be returned to office vs. 44% who say they should be reelected. The shift in opinion has been particularly sharp among women and Democrats.

Gun Control and Congress*					
If a member opposes					
gui	n control <mark>I</mark>	OON'T reelect

	%	%			
Men	50	43			
Women	60	39			
Republican	38	26			
Democrat	69	48			
Independent	59	45			
* Based on registered voters.					

The fact remains, however, that a vote *in favor* of gun control is a political plus for many members of Congress. Fully 60% of voters say that a lawmaker who backed gun control should be reelected, down slightly from the 69% who held this view last year. Only 25% say a member who has supported gun control shouldn't be returned to office.

Heading into the 2000 elections, it is unclear at this point which political party — or presidential candidate — has the upper hand on the question of gun control. The Democrats maintain a slight edge, along with Al Gore. In a Pew survey released last month, 41% said the vice president could do a better job representing their views on gun control, 37% chose George W. Bush.

Opinion about the role of the National Rifle Association is largely unchanged in recent years. A plurality of Americans (42%) say the NRA has too much influence over gun control laws in this country, 17% say the organization has too little influence, and 28% say its influence is about right. Similarly, in December 1993, 45% said the NRA was too influential, 15% said it had too little influence and 27% thought it had about the right amount of influence over gun laws.

In a similar vein, the percentage of Americans who believe that more gun restrictions will help reduce violent crime in this country has not increased significantly in recent years. And the public places more faith in several other potential solutions. Roughly four-in-ten Americans (41%) say stricter gun control laws would reduce violent crime "a lot," similar to the 39% who held this view in March 1994. More jobs and community programs for

young people is a much more popular approach. Longer jail terms for violent criminals, as well as restrictions on the amount of violence shown on TV are endorsed by about half of the public (49% and 48%, respectively). Nearly as many (46%) say more police on the streets would help reduce violent crime.

Gonzalez Case Top Story

The long-running saga of Elian Gonzalez was once again the month's top news story. Interest in this story has slipped slightly from January (39% following very closely) and February (37%), when it also led the monthly news indexes.

The stock market's recent convulsions were closely followed by about one-in-five (19%) Americans. Surprisingly, interest in this story did not increase following the sharp declines April 14 in both the Dow Jones industrial average and the NASDAQ composite index. Those who were interviewed *before* the market plunge tuned in at about the same rate as those who were surveyed from April 14-16.

With the presidential primary season over, fewer Americans paid close attention to coverage of the campaign. Overall, about 18% say they followed election news very closely, down from 26% in both March and February. More Republicans (25%) showed strong interest than either Democrats (18%) or independents (13%).

The recent court ruling against the software company Microsoft failed to garner much attention. Just 13% say they paid very close attention to the judge's decision in the high-profile case, about the same who followed progress of the antitrust trial in December 1999 (11%) and November 1998 (12%).

ABOUT THIS SURVEY

Results for the *April* survey are based on telephone interviews conducted under the direction of Princeton Survey Research Associates among a nationwide sample of 1,000 adults, 18 years of age or older, during the period April 12-16, 2000. For results based on the total sample, one can say with 95% confidence that the error attributable to sampling and other random effects is plus or minus 4 percentage points. For results based on either Form 1 (N=500) or Form 2 (N=500), the sampling error is plus or minus 5 percentage points. For results based on parents (N=283), the sampling error is plus or minus 7 percentage points.

Results for the *March* survey are based on telephone interviews conducted under the direction of Princeton Survey Research Associates among a nationwide sample of 1,184 adults, 18 years of age or older, during the period March 15-19, 2000. For results based on the total sample, one can say with 95% confidence that the error attributable to sampling and other random effects is plus or minus 3.5 percentage points.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

SURVEY METHODOLOGY IN DETAIL

The sample for this survey is a random digit sample of telephone numbers selected from telephone exchanges in the continental United States. The random digit aspect of the sample is used to avoid "listing" bias and provides representation of both listed and unlisted numbers (including not-yet-listed). The design of the sample ensures this representation by random generation of the last two digits of telephone numbers selected on the basis of their area code, telephone exchange, and bank number.

The telephone exchanges were selected with probabilities proportional to their size. The first eight digits of the sampled telephone numbers (area code, telephone exchange, bank number) were selected to be proportionally stratified by county and by telephone exchange within county. That is, the number of telephone numbers randomly sampled from within a given county is proportional to that county's share of telephone numbers in the U.S. Only working banks of telephone numbers are selected. A working bank is defined as 100 contiguous telephone numbers containing three or more residential listings.

The sample was released for interviewing in replicates. Using replicates to control the release of sample to the field ensures that the complete call procedures are followed for the entire sample. The use of replicates also insures that the regional distribution of numbers called is appropriate. Again, this works to increase the representativeness of the sample.

At least five attempts were made to complete an interview at every sampled telephone number. The calls were staggered over times of day and days of the week to maximize the chances of making a contact with a potential respondent. All interview breakoffs and refusals were re-contacted at least once in order to attempt to convert them to completed interviews. In each contacted household, interviewers asked to speak with the "youngest male 18 or older who is at home." If there is no eligible man at home, interviewers asked to speak with "the oldest woman 18 or older who is at home." This systematic respondent selection technique has been shown empirically to produce samples that closely mirror the population in terms of age and gender.

Non-response in telephone interview surveys produces some known biases in survey-derived estimates because participation tends to vary for different subgroups of the population, and these subgroups are likely to vary also on questions of substantive interest. In order to compensate for these known biases, the sample data are weighted in analysis.

The demographic weighting parameters are derived from a special analysis of the most recently available Census Bureau's Current Population Survey (March 1999). This analysis produced population parameters for the demographic characteristics of households with adults 18 or older, which are then compared with the sample characteristics to construct sample weights. The analysis only included households in the continental United States that contain a telephone.

The weights are derived using an iterative technique that simultaneously balances the distributions of all weighting parameters.

ROTATE Q.3/4, Q.5/6 IN BLOCKS:

ASK FORM 1 ONLY:

Q.3F1 Suppose a member of Congress voted FOR impeaching and trying President Clinton. Do you think this member should be re-elected, or not?

BASED ON REGISTERED VOTERS [N=358]:

		July 1999
49	Should be	57
33	Shouldn't be	31
<u>18</u>	Don't know/Refused	<u>12</u>
100		100

ASK FORM 2 ONLY:

Q.4F2 Suppose a member of Congress voted AGAINST impeaching and trying President Clinton. Do you think this member should be re-elected, or not?

BASED ON REGISTERED VOTERS [N=358]:

		July 1999
48	Should be	52
32	Shouldn't be	38
<u>20</u>	Don't know/Refused	<u>10</u>
100		100

ASK FORM 1 ONLY:

Q.5F1 Suppose a member of Congress voted AGAINST gun control. Do you think this member should be re-elected, or not?

BASED ON REGISTERED VOTERS [N=358]:

		July 1999
44	Should be	35
41	Shouldn't be	55
<u>15</u>	Don't know/Refused	<u>10</u>
100		100

ASK FORM 2 ONLY:

Q.6F2 Suppose a member of Congress voted FOR gun control. Do you think this member should be re-elected, or not?

BASED ON REGISTERED VOTERS [N=358]:

		July 1999
60	Should be	69
25	Shouldn't be	25
<u>15</u>	Don't know/Refused	<u>6</u>
100		100

[NO Q.7/Q.8]

ASK ALL:

Q.9 Please tell me if you think the REPUBLICAN Party or the DEMOCRATIC Party could do a better job of reflecting your views about gun control?⁴

		June	Dec
		<u>1999</u>	1993
30	Republican Party	34	32
36	Democratic Party	42	42
4	Both equally (VOL.)	4	_
7	Neither (VOL.)	8	8
<u>23</u>	Don't know/Refused	<u>12</u>	<u>18</u>
100		100	100

Q.10 Now, I am going to read you some things that might be done to reduce violent crime in this country. As I read each one, please tell me if you think it would reduce the amount of violent crime a lot, a little or not at all? Do you think [ROTATE ITEMS] would reduce the amount of violent crime a lot, a little, or not at all?

				Not	Don't
FORM	1 [N=500]; FORM 2 [N=500]:	A Lot	A Little	At All	Know
a.F1	Stricter gun control laws	41	33	24	2 = 100
	March, 1994	39	28	31	2 = 100
	December, 1993	41	32	26	1=100
b.F2	More police on the streets	46	45	7	2=100
	March, 1994	57	36	6	1=100
	December, 1993	53	38	7	2=100
c.F1	More job and community programs for young people	63	29	7	1=100
d.F2	Restrictions on the amount of violence shown on TV	48	37	14	1=100
	March, 1994	43	40	16	1=100
	December, 1993	49	36	14	1=100
e.F1	Longer jail terms for those convicted of violent crimes	49	33	15	3=100
	March, 1994	69	23	7	1=100
	December, 1993	63	23	11	3=100

Question usually asked as part of a series.

ASK ALL:

Q.12 Do you think the National Rifle Association has too much influence, too little influence or, the right amount of influence over gun control laws in this country?

		Dec	Time/CNN
		<u>1993</u>	Aug 1993
42	Too much	45	39
17	Too little	15	15
28	Right amount	27	33
<u>13</u>	Don't know/Refused	<u>13</u>	<u>13</u>
100		100	100

Q.13 In general, how safe would you say you and your family are from crime at each of the following locations? (First/How about)... (**READ AND ROTATE**) — are you and your family very safe, somewhat safe, not too safe or not at all safe from crime?

						(VOL.)	
			Some-	Not	Not	Does	Don't
		Very	what	Too	At All	Not	Know/
		Safe	<u>Safe</u>	Safe	Safe	Apply	Refused
a.	At home at night	67	28	4	1	0	*=100

	Pew Center: October, 1999	35	38	8	3	16	1=100

Q.18 THRU Q.20 BASED ON PARENTS OF CHILDREN AGE 5-17: [N=283]

Q.18 I am going to read a list of things that have been in the news recently. For each, please tell me how much, if at all, you have talked about it with this child. First, how much have you talked about (INSERT ITEM; ROTATE)... a lot, some, not too much, or not at all? What about...

				Not too	Not	DK/
		A Lot	<u>Some</u>	Much	At All	Refused
a	The 2000 presidential election campaign	7	26	19	47	1=100
b	The debate over whether 6-year-old Elian					
	Gonzalez should be returned to his father in Cuba	10	31	17	42	*=100
c.	The shootings that have occurred at schools					
	across the country	45	32	13	10	*=100
	Child: 5-11	34	35	18	13	0 = 100
	Child: 12-17	56	29	8	6	1=100
	September, 1998 (Parents of children 8 to 17)	41	40	11	8	0=100
	Child: 8-10	30	43	13	14	0 = 100
	Child: 11-13	47	37	9	7	0 = 100
	Child: 14-17	47	40	9	4	0=100

- Q.19 Thinking about your child's personal safety at school, do you think your child is very safe at school, somewhat safe, not too safe or not at all safe?
 - 40 Very safe
 - 50 Somewhat safe
 - Not too safe 6
 - 2 Not at all safe
 - Child not in school (VOL.) SKIP TO Q.24
 - $\frac{1}{100}$ Don't know/Refused
- Q.20 How concerned, if at all, does your child seem about (his/her) personal safety at school — very concerned, somewhat concerned, not too concerned or not at all concerned?
 - 12 Very concerned
 - 22 Somewhat concerned
 - 27 Not too concerned
 - 37 Not at all concerned
 - 2 Child not in school (VOL.) SKIP TO Q.24
 - 0 Don't know/Refused
 - 100

Q.21 THRU Q.23 BASED ON PARENTS OF CHILDREN AGE 5-17 WHO ATTEND SCHOOL: [N=278]

- Q.21 To your knowledge have there been any serious threats of violence involving children at your child's school?
 - 17 Yes
 - 81 No
 - <u>2</u> Don't know/Refused

100

- Q.22 How much, if it all, did the Columbine shooting last year change your views about how safe your child is at school? Did your views change a lot, some, only a little or not at all?
 - 44 A lot
 - 27 Some
 - 17 Only a little
 - Not at all
 - * Don't know/Refused

100

- Q.23 Do you happen to know if your child's school has taken any measures to ensure safety in the past year, such as installing metal detectors, closed circuit TV cameras, or hiring police or security guards?
 - 37 Yes
 - 53 No
 - 10 Don't know/Refused

100

ASK ALL:

Q.24 Now I have some questions about the recent school shootings like the one at Columbine High school in Colorado...In general, what do you think is the MAIN reason why kids commit such violence? (**READ**)

		Newsweek
		<u>April 1999</u>
4	Genetic or biological tendencies toward violence	5
42	Poor upbringing from parents	36
26	Violence in the media they are exposed to	34
14	Peer pressure from other kids	15
7	Other (VOL.)	7
<u>7</u>	Don't know/Refused	3
100		100

Q.25 Which ONE of the following do you think is the most effective way to prevent such things from happening?... (READ and ROTATE)

		Newsweek April 1999 ⁵
	Increasing school security, such as installing metal	
11	detectors and hiring more guards	21
6	Passing stricter gun control laws	11
	Paying more attention to kids' anti-social	
60	attitudes and behaviors	49
13	Reducing violence in popular entertainment	14
6	Other (VOL.)	3
4	Don't know/Refused	2
100		100

- Q.26 In the end, who's mostly responsible for ensuring that children don't commit violent acts at school...Is it mostly the schools' responsibility or mostly the parents' responsibility?
 - School responsibility
 - 85 Parent responsibility
 - 3 Other
 - <u>3</u> 100 Don't know/Refused

ON ANOTHER SUBJECT ...

In the past 12 months, have you or your family, or has someone else in your neighborhood... (INSERT ITEM; Q.27 **ROTATE ORDER.)**?⁶

		Yes, Self	Yes, Someone Else		Don't know/
		Or Family	In Neighborhood	<u>No</u>	Refused
a.	Had money or property stolen	11	12	76	1=100
	June, 1997	14	20	64	2 = 100
	March, 1994	16	22	61	1=100
