## Big Doubts About News Media's Values <br> PUBLIC VOTES FOR CONTINUITY AND CHANGE IN 2000

The anomalies of American public opinion continue even as the impeachment trial fades into history. Today, the public view of the state of the nation is much improved, despite the fact that a major component of that view - trust in government - remains low. Politically, the public expresses negative views of the Republican Party, yet is more inclined to vote for leading GOP presidential candidates than Democrats. Moreover, Americans say they want the next president to carry on the policies and programs of the current administration, but almost no one wants another Clinton, and support for Vice President Al Gore is tepid.

The only clear and consistent trend is discontent with the news media. Public criticism of press practices and coverage of the Clinton-Lewinsky scandal continues. And the negative view of the news media now extends to its values, with growing numbers of Americans describing the press as immoral, unprofessional and uncaring about the country. Just about the only good news for the press in a new Pew Research Center survey is that Americans still believe the press cares about the job it does.

The next election is still almost two years away, but Americans have some ideas about what they want in their next president and rather definite ideas about what - and who they don't want. A modest 54\%-to-41\% majority says it wants a president who offers policies and programs similar to those of the Clinton administration. However, an overwhelming 78\% says that even taking into account Bill Clinton’s personal strengths they want a different kind of person in the White House.

Majorities of registered voters who know them also say they don't want Dan Quayle, Patrick Buchanan, Lamar Alexander, Robert Smith, Gary Bauer, or Steve Forbes to be president. In contrast to this largely ideological group of candidates, substantial percentages say there is a chance they would vote for perceived moderate candidates such as

| * Based on registered voters. |  | Republicans George W. Bush, Elizabeth Dole and John McCain or Democrats Al Gore and Bill Bradley.

Potential support for more middle-of-the-road candidates is in keeping with the moderation observed in the results of the mid-term elections and the public's continued satisfaction with the status quo. Americans today not only rate the state of their own lives very highly, but they also rate the country as a whole more highly than they have in over 30 years.

Not so the news media. The press gets barely a "C" for its final grade on coverage of the Clinton-Lewinsky scandal, and the public continues to give the news media poor performance grades for accuracy, correcting mistakes and the way they play their watchdog role. Moreover, the new survey finds a striking decline in the public's perception of news media values since the mid-1980s. The number of Americans seeing news organizations as immoral has tripled, leaving the public evenly split (38\%-to-40\%) on whether the press is immoral or not. Similarly, the two-to-one belief that the press protected democracy in 1985 has evaporated. Today, the

| Eroding Media Values |  |  |
| :--- | :---: | :---: |
| Best Describes <br> News Media? <br> Moral | $\frac{1985}{\%}$ | $\frac{1999}{\%}$ |
| Immoral | 54 | 40 |

| Hurt democracy | 23 | 38 |
| Professional <br> Unprofessional | 72 | 52 | public is divided, with $45 \%$ saying the news media protect democracy and $38 \%$ saying they hurt it.

These are the principal findings of the Pew Research Center's latest nationwide telephone survey of 1,203 adults. The survey was conducted February 18-21, 1999 and has a margin of error of 3 percentage points.

## Spike in National Mood

The public's sense of how well the country is doing has finally caught up with Americans' positive ratings of their own lives. In fact, the national mood is better today than at any time since the 1960s, and the public is even more optimistic about the future. Nearly one-in-three Americans give the country high ratings today, reflecting a substantial jump from just 10\% in 1996 and 20\% a year ago. One-third of Americans (36\%) say the outlook for the next five years is just as strong.

The upswing in the national mood has diminished the traditional "optimism gap" - the tendency for Americans to rate their own lives substantially better than they rate the country. Indeed, while personal satisfaction remains high $43 \%$ place themselves on the top three steps of an eleven-step rating ladder the gap between the
 personal and national ratings is substantially smaller than it was several years ago.

The increase in positive ratings for the country has been largest among less affluent groups, who typically express lower levels of satisfaction with the state of the nation. Fully $30 \%$ of those with a high school education or less give the country a high rating, for example, up from just 18\% a year ago.

Men continue to rate the condition of the country more favorably than women do, and the national ratings are colored by partisanship, as well. Just 18\% of Republicans give the country a high rating, for example, compared to $23 \%$ of Independents and $38 \%$ of Democrats.

Over the past four decades, the national mood has tended to rise and fall along with the level of public trust in government. ${ }^{1}$ But the spike in public optimism today marks a divergence in this trend: Even as ratings for the country are up, the public's level of trust in government and elected officials is flat at best. Just $31 \%$ of Americans say they trust the government at least most of the time, down from 38\% in late 1997.

[^0]Indeed, one major consequence of the year-long investigation and the impeachment trial of President Clinton may be new worries about the nation's political leadership. Asked to describe in their own words their hopes and fears for the country, one-in-five Americans mention government and politics.

For example, today $18 \%$ mention government and political leadership as a concern for the nation. This is the same number as in a February 1998 survey, after the Clinton-Lewinsky scandal broke, and up substantially from 8\% in 1996. Just as many Americans

| National Disunity | 0 | 8 | 26 | 13 | -- | -- | -- | mentioned government and politics when describing their hopes and wishes for the country's future.

Peace and prosperity also remain top issues. Some 31\% of Americans today mention economic factors as their main hope for the nation's future, while nearly as many (29\%) mention national security and war as their top worry for the country.

## Looking for New Faces?

The person matters more than the political party to Americans when thinking about choosing the next president. Some 61\% say they care a good deal which party wins the White House, a figure that is unchanged from before the last presidential election. But $83 \%$ say they care who gets elected, up somewhat from $78 \%$ in 1995 . What's more, just $49 \%$ of the public says the press should focus mostly on what a candidate believes about issues, down from 69\% in 1995. Growing numbers of Americans say the press should focus mostly on candidates’ past accomplishments ( $36 \%$, up from $23 \%$ in 1995) and what a candidate is like as a person (12\%, up from 6\%).

That the public places greater importance on who becomes president rather than which party wins the White House may explain why several potential Republican candidates lead in the polls, despite the party's low ratings. But with the election more than a year away, the slate of possible presidential contenders is also divided by wide gaps in how well the candidates are known.

Nearly all voters say they have heard of Democrats Al Gore (98\%) and Jesse Jackson (98\%) and Republicans Dan Quayle (97\%), George W. Bush (94\%), and Elizabeth Dole (91\%). Among these well-known contenders, Bush, Dole, and Gore draw favorable ratings: 72\% of voters say they would consider voting for Bush, $64 \%$ for Dole and $52 \%$ for Gore. ${ }^{2}$ These are comparable to the ratings given leading candidates a year before the 1996 election. Some $56 \%$ of voters said in October 1995 they would consider voting for Clinton, for example, while $48 \%$ said they might vote for Bob Dole.

However, other potential candidates face greater obstacles, despite their high visibility. Most voters say there is no chance they would support Dan Quayle (54\%) or Jesse Jackson (56\%). And while many voters say they have heard of Patrick Buchanan (83\%) and Steve Forbes (71\%), neither draws a majority who would consider voting for him.

Falling somewhere in the middle are candidates like Bill Bradley, John Kerry, Lamar Alexander, and John McCain potential candidates who are not

| Rating the Presidential Contenders (Based on Registered Voters) |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Have | Chance of Voting Among Those Who Have Heard |  |  |  |  |
|  | Heard | Good | Some | No | DK. | (N) |
| Al Gore | 98 | 22 | 30 | 45 | 3=100 | (910) |
| Jesse Jackson | 98 | 12 | 30 | 56 | 2=100 | (904) |
| Dan Quayle | 97 | 9 | 33 | 54 | 4=100 | (902) |
| George W. Bush | 94 | 34 | 38 | 24 | 4=100 | (868) |
| Elizabeth Dole | 91 | 26 | 38 | 33 | 3=100 | (854) |
| Patrick Buchanan | n 83 | 6 | 26 | 63 | 5=100 | (782) |
| Steve Forbes | 71 | 8 | 35 | 52 | 5=100 | (685) |
| Bill Bradley | 55 | 14 | 41 | 39 | 6=100 | (531) |
| Lamar Alexander | r 42 | 6 | 27 | 60 | 7=100 | (421) |
| John Kerry | 38 | 8 | 37 | 48 | $7=100$ | (374) |
| John McCain | 32 | 16 | 42 | 35 | $7=100$ | (332) |
| John Kasich | 21 | 16 | 31 | 45 | 8=100 | (229) |
| Gary Bauer | 18 | 12 | 26 | 51 | 11=100 | (188) |
| Robert Smith | 12 | 8 | 19 | 64 | $9=100$ | (120) | widely known. But Bradley and McCain get mostly positive marks from voters who have heard of them. Among these voters, about half (55\%) say they would consider voting for Bradley, and $58 \%$ say they would consider supporting McCain. There is less enthusiasm for Kerry and still less for Alexander.

Finally, several candidates remain unknown to the average voter. Barely one-in-five voters say they have heard of John Kasich (21\%) or Gary Bauer (18\%), and fewer still have heard of Robert Smith (12\%). Among the small number who are familiar with these candidates, Kasich gets modest support (47\% would consider voting for him), but Bauer (38\%) and Smith (27\%) draw less enthusiasm.

Among the leading Republican candidates, Dole has no real edge among her husband's supporters. Although $46 \%$ of those who supported Bob Dole in 1996 say there's a good chance they would vote for Elizabeth Dole, fully two-thirds (67\%) say there is a good chance they would vote for Bush. ${ }^{3}$ At the same time, while most potential GOP candidates earn less support from women than from men, Dole does equally well with men and women. Overall, $64 \%$ of men and $64 \%$ of women say they would consider voting for Dole. In this early poll, the leading Democratic candidates do no better among women than among men (see Table, page 16).

## Little Clinton Boost for Gore

Though Clinton's job approval rating remains high at 64\%, there are some signs that the president's popularity may not transfer fully to his vice president. Among voters who now approve of the job Clinton is doing as president, just $32 \%$ say there is a good chance they would vote for Gore, and $26 \%$ say there is no chance they would vote for Gore.

Even among the majority of Americans who support continuing the Clinton administration's policies, Gore's numbers are mixed. Just $30 \%$ of voters who want the next president to pursue similar policies and programs - just with a different type of person - say there is a good chance they would vote for Gore, while $27 \%$ say there is no chance they would support the vice president. Not surprisingly, those who oppose Clinton's policies - and those who wanted him removed from office - are

| Filling Clinton's Shoes? |  |  |  |

|  | ( $\mathrm{N}=104$ ) | $(\mathrm{N}=336)$ | $(\mathrm{N}=364$ ) | overwhelmingly against Gore.

3 There has been some speculation that some voters may be confusing George W. Bush with his father, the former president, but the younger Bush gets equally strong support whether he is identified as "Texas Governor George W. Bush" or simply as "George W. Bush."

## Specific Programs Trump General Tax Cuts

Most Americans finally accept that the federal government has made significant progress in reducing the federal budget deficit. As recently as May 1997, only $29 \%$ of the public thought progress had been made; today that number is $61 \%$.

When it comes to utilizing that surplus, the public favors specific spending proposals over a tax cut. Assuming that roughly two-thirds of the surplus will be set aside for Social Security, 65\% of the public says the remainder should be spent on education, the environment, health care, crimefighting and military defense. Only $27 \%$ favors putting the remaining one-third of the surplus toward a tax cut.

Even Republicans only narrowly support returning the remaining surplus money to the public in the form of a tax cut - $50 \%$ support this option. However, 39\% of GOP loyalists favor spending some of the surplus funds on education, the environment, health care and the like. White men and those making \$75,000 a year or more express higher than average support for a tax cut, but solid majorities in every major demographic group favor the proposed

| Spending the Surplus |  |  |  |
| :---: | :---: | :---: | :---: |
|  | Rep | Dem | Ind |
| Use remaining one third of surplus for... | \% | \% | \% |
| Tax cut | 50 | 14 | 27 |
| Spending on education, environment, health care | 39 | 81 | 65 |
| Some other purpose | 7 | 4 | 5 |
| Don't know | $\frac{4}{100}$ | $\frac{1}{100}$ | $\frac{3}{100}$ | spending. Democrats and Independents overwhelmingly support spending over a tax cut, $81 \%$ and $65 \%$ respectively.

Interestingly, support for a broad tax cut is much stronger when the alternative is funding for unspecified new government programs. In that case, half of the respondents (53\%) say the remainder of the surplus should be used for a tax cut; only 34\% opt for funding on "new government programs."

If some form of tax cuts are in the offing, the public favors a more targeted approach over the across-the-board solution. Fully $58 \%$ say that if there is to be a tax cut, they would prefer targeted benefits for lower and middle class Americans to help offset the costs of education, child care and long-term care. Far fewer - 37\% - favor the GOP’s proposed 10\% across-the-board income tax cut which would apply equally to all Americans, regardless of how much money they make.

Women overwhelmingly favor the targeted approach ( $63 \%$ vs. $32 \%$ who would prefer an across-the-board cut). Men are more evenly divided, though a narrow majority backs targeted benefits (53\% vs. 42\%). Republicans split nearly down the middle: 50\% support their party's proposed $10 \%$ cut, and $46 \%$ prefer targeted benefits.

Americans express strong to moderate support for several specific tax cut proposals. Twothirds of the public (67\%) consider giving tax credits to people who provide long-term care to elderly or disabled family members a very important thing for Congress to do. Fully $61 \%$ support the idea of increasing the amount of money senior citizens can earn before their Social Security benefits are reduced. Nearly half (48\%) say eliminating the so-called marriage penalty is a very important thing for Congress to do. Fewer think it is important for Congress to provide a $10 \%$ across-the-board income tax cut or lower the capital gains tax ( $42 \%$ and $31 \%$, respectively).

By a 57\%-to-38\% margin, the public favors renewing the independent counsel law. Support is strongest among Republicans (76\% favor), while Democrats are evenly divided (49\%-to-47\%).

## Media Values in Doubt

The public's evaluation of press values has plummeted over the past 15 years, with increasing numbers of Americans saying the news media is immoral, unprofessional and disrespectful. Consistent with this, public assessment of the news media's job performance remains anemic, and the grades given to the press for its coverage of the Clinton-Lewinsky scandal are poor.

The decline in the Americans' ratings of press values is startling. The number of Americans who describe the news media as immoral jumped three-fold to $38 \%$ from $13 \%$ in 1985. The increase in those who say the news media lack professionalism is comparable, climbing to $32 \%$ from $11 \%$. And today, two-thirds of Americans say the press displays a disregard for the people it covers ( $67 \%$ from $48 \%$ ). Two-thirds of the public also says the press tries to cover up its mistakes -

a jump since 1985, when just over half of the public said so.

The press' role in protecting democracy has also tumbled in the public mind. Americans are divided 45\%-to-38\% over whether the news media protect or hurt democracy. In 1985, the public saw the press as a democratic caretaker by a two-to-one margin (54\%-to-23\%). In addition Americans now split evenly (41\%-to-42\%) over whether the press is too critical of the United States, a significant change from the mid-1980s when the public described the news media as standing up for America by a 52\%-to-30\% margin.

While a majority of Americans continue to see the news media's influence on the rise, the number who say it is in decline has nearly doubled since 1985. Today, $32 \%$ say the press is declining in influence, up from $17 \%$. In another remarkable decline in esteem for the news media, a $56 \%$ majority of the public describes the press as politically biased, an 11 percentage point increase over this same period.

## Low Performance Ratings

Public criticism of the way the press does its job has not significantly worsened as a result of the Clinton-Lewinsky scandal. Currently, $58 \%$ of the public doubts the general accuracy of news reports and $31 \%$ thinks that criticism by the press keeps political leaders from doing their jobs both numbers are virtually unchanged from February 1997. Similarly, the $72 \%$ of Americans who now see the media as propagating scandals mirrors the $74 \%$ who felt this way in 1995 . And, the public remains divided in its opinion of the media, just as it was prior to the barrage of Lewinsky coverage ( $49 \%$ favorable, $49 \%$ unfavorable now vs. $50 \%$-to- $48 \%$ in 1997).

The perception that news organizations drive controversies by devoting so much time and space to the personal and ethical behavior of public figures holds across races, ages, genders, and education and income levels. Even among those who disapprove of Clinton's performance as president and those who are critical of the Senate impeachment vote, six-in-ten share the view that the media perpetuates scandals.

Similarly, the belief that news stories and reports are often inaccurate is consistent for solid majorities of Democrats and Republicans, Clinton supporters and detractors, those who approve of the Senate vote and those who disapprove. Some of the harshest criticism is from blacks, Americans age 50 and up, and the less affluent; about two-thirds of each group finds the press often inaccurate.

Finally, a significant minority of the public questions the press’ adversarial role in our democracy, with nearly one-third saying that criticism by the press keeps political leaders from doing their jobs. This is almost a two-fold increase since 1985, when only $17 \%$ of the public expressed concern about the negative effects of the press’ watchdog role, but is unchanged from the $32 \%$ who said so in pre-Lewinsky 1997.

## Poor Grades for Impeachment Coverage

Given the public's criticism of the press' values and performance in general, it is no surprise that a solid majority of Americans give the media poor grades for their coverage of the investigation and impeachment trial of President Clinton. The news media get a "C" or worse from 59\% of Americans.

The press draws poor grades from a majority of all ages, races, genders, and income levels. Even those who disagree on the appropriateness of the final Senate vote agree on their rating of the press: $59 \%$ of both groups give the news media a "C" or worse for their coverage. Some of the sharpest criticism comes from college graduates ( $67 \%$ give poor grades) and Republicans ( $64 \%$ rated the press coverage "C" or lower, compared to $55 \%$ of Democrats and 58\% of Independents).

| Low Grades \& Weak Values |  |  |
| :---: | :---: | :---: |
| Investigation Coverage Rated |  |  |
|  | A or B | D or |
| News Organizations... | \% | \% |
| Don't care about people report on | 57 | 74 |
| Cover up mistakes | 53 | 75 |
| Politically biased in reporting | 43 | 66 |
| Too critical of America | 34 | 47 |
| Immoral | 27 | 46 |
| Declining in influence | 23 | 39 |
| Hurt democracy | 25 | 45 |
| Not professional | 20 | 41 |
| Don't care about doing a good job | 12 | 29 |

These harsh evaluations of the press coverage of the investigation and impeachment of President Clinton are closely linked to the public's similarly negative views of the news media's values. Those who gave the press poor grades for their coverage of this particular controversy were especially critical of the news media's values, practices and watchdog role.

The differences between the attitudes of these harsh and lenient graders of the press are consistent across every measure of the media's values. Three-quarters of those who view press coverage of the Clinton-Lewinsky controversy negatively accuse news organizations of not caring about the people they cover and trying to cover up mistakes: Only $57 \%$ and $53 \%$, respectively, of those who gave the press positive ratings agree. Two-thirds of harsh graders say the press is politically biased; less than half (43\%) of lenient graders agree. And, $46 \%$ of critics of the scandal coverage attribute immorality to news organizations, compared to just $27 \%$ of those less critical of the media's handling of the Clinton-Lewinsky story.

## News Interest Index

With videotaped depositions and a final vote in the Senate, President Clinton’s impeachment trial topped the news interest index for the month with $31 \%$ of the public following the trial in the Senate very closely, up from a low of $22 \%$ in mid-January. More than one-third of Republicans and Democrats paid very close attention to the story, compared to $25 \%$ of Independents.

Notwithstanding the recent flurry of speculation that Hillary Clinton might run for the U.S. Senate in New York, only $19 \%$ of the public said they were following the story very closely in this poll. Interest in the story was higher in the East, where $28 \%$ of adults paid very close attention. Not surprisingly, more women (21\%) followed the story very closely than did men (16\%), and interest was highest among African-Americans (30\% followed it very closely, compared to $17 \%$ of whites).

Before the verdict, nearly one-in-four Americans were paying very close attention to the Jasper, Texas murder trial, in which a white man was charged with dragging a black man to his death behind a truck. Interest in the story was particularly high among blacks, with $48 \%$ following it very closely, more than twice that of whites (21\%). The recent labor dispute and flight cancellations at American Airlines drew the very close attention of only $18 \%$ of the public, and reports of corruption in the International Olympic Committee continued to garner little public interest, with just $11 \%$ following the story very closely.

In international news, interest in NATO efforts to end ethnic conflict in Kosovo, Serbia remained relatively low. Despite recent increases in America's military presence in the region and threats of military action, only one-in-ten adults followed this story very closely - a number unchanged since mid-January. Similarly, only $5 \%$ of the public paid very close attention to demonstrations throughout Europe protesting the capture of Kurdish rebel leader Abdullah Ocalan.

## SURVEY METHODOLOGY

#### Abstract

ABOUT THIS SURVEY

Results for the main survey are based on telephone interviews conducted under the direction of Princeton Survey Research Associates among a nationwide sample of 1,203 adults, 18 years of age or older, during the period February 18-21, 1999. For results based on the total sample, one can say with $95 \%$ confidence that the error attributable to sampling and other random effects is plus or minus 3 percentage points. For results based on either Form 1 ( $\mathrm{N}=603$ ) or Form 2 ( $\mathrm{N}=600$ ), the sampling error is plus or minus 4.5 percentage points.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

## SURVEY METHODOLOGY IN DETAIL

The sample for this survey is a random digit sample of telephone numbers selected from telephone exchanges in the continental United States. The random digit aspect of the sample is used to avoid "listing" bias and provides representation of both listed and unlisted numbers (including not-yet-listed). The design of the sample ensures this representation by random generation of the last two digits of telephone numbers selected on the basis of their area code, telephone exchange, and bank number.

The telephone exchanges were selected with probabilities proportional to their size. The first eight digits of the sampled telephone numbers (area code, telephone exchange, bank number) were selected to be proportionally stratified by county and by telephone exchange within county. That is, the number of telephone numbers randomly sampled from within a given county is proportional to that county's share of telephone numbers in the U.S. Only working banks of telephone numbers are selected. A working bank is defined as 100 contiguous telephone numbers containing three or more residential listings.

The sample was released for interviewing in replicates. Using replicates to control the release of sample to the field ensures that the complete call procedures are followed for the entire sample. The use of replicates also insures that the regional distribution of numbers called is appropriate. Again, this works to increase the representativeness of the sample.

At least five attempts were made to complete an interview at every sampled telephone number. The calls were staggered over times of day and days of the week to maximize the chances of making a contact with a potential respondent. All interview breakoffs and refusals were re-contacted at least once in order to attempt to convert them to completed interviews. In each contacted household, interviewers asked to speak with the "youngest male 18 or older who is at home." If there is no eligible man at home, interviewers asked to speak with "the oldest woman 18 or older who is at home." This systematic respondent selection technique has been shown empirically to produce samples that closely mirror the population in terms of age and gender.

Non-response in telephone interview surveys produces some known biases in survey-derived estimates because participation tends to vary for different subgroups of the population, and these subgroups are likely to vary also on questions of substantive interest. In order to compensate for these known biases, the sample data are weighted in analysis.

The demographic weighting parameters are derived from a special analysis of the most recently available Census Bureau's Current Population Survey (March 1996). This analysis produced population parameters for the demographic characteristics of households with adults 18 or older, which are then compared with the sample characteristics to construct sample weights. The analysis only included households in the continental United States that contain a telephone.

The weights are derived using an iterative technique that simultaneously balances the distributions of all weighting parameters.

## QUESTIONNAIRE

# PEW RESEARCH CENTER FOR THE PEOPLE \& THE PRESS FEBRUARY 1999 NEWS INTEREST INDEX <br> - FINAL TOPLINE - <br> February 18-21, 1999 <br> $\mathrm{N}=1,203$ 

Hello, I am $\qquad$ calling for Princeton Survey Research Associates in Princeton, New Jersey. We are conducting a telephone opinion survey for leading newspapers and TV stations around the country. I'd like to ask a few questions of the youngest male, 18 years of age or older, who is now at home. [IF NO MALE, ASK: May I please speak with the oldest female, 18 years of age or older, who is now at home?]
Q. 1 Do you approve or disapprove of the way Bill Clinton is handling his job as President? [IF DK ENTER AS DK. IF DEPENDS PROBE ONCE WITH: Overall do you approve or disapprove of the way Bill Clinton is handling his job as President? IF STILL DEPENDS ENTER AS DK]

## ON ANOTHER SUBJECT,

Q. 3 Let's talk about the quality of your life. Imagine a ladder with steps numbered from zero at the bottom to 10 at the top. Suppose the top of the ladder represents the best possible life for you; and the bottom, the worst possible life for you. On which step of the ladder [INSERT ITEM]? You can name any number between zero and 10. ... And on what number step [INSERT ITEM]? ...

## [READ A-C IN ORDER:]

a. do you feel you personally stand at the present time?

## ON ANOTHER SUBJECT,

ASK FORM 1 ONLY: [ $\mathrm{N}=603$ ]
Q. 24 In your opinion, over the past few years have we made significant progress in reducing the federal budget deficit, or not?

|  | May | Dec | Feb |  |
| :--- | :--- | :---: | :---: | :---: |
|  |  | $\frac{1997}{29}$ | $\frac{1994}{26}$ | $\underline{1989}$ |
| 61 | Yes | 59 | 65 | 77 |
| 29 | No | $\underline{12}$ | $\underline{9}$ | $\underline{8}$ |
| $\frac{10}{10}$ | Don't know/Refused | 100 | 100 | 100 |

## ASK FORM 2 ONLY: [ $\mathbf{N = 6 0 0}$

Q.24a In your opinion, have we made significant progress in reducing the federal budget deficit, or not?

| 61 | Yes |
| :--- | :--- |
| 31 | No |
| $\frac{8}{100}$ | Don't know/Refused |

## ASK FORM 1 ONLY: [N=603]

Q.25F1 President Clinton has proposed setting aside approximately two-thirds of an expected budget surplus to fix the Social Security system. What do you think the leaders in Washington should do with the remainder of the surplus? Should the money be used for a tax cut, OR should it be used to fund new government programs?

| 53 | Should be used for a tax cut |
| :---: | :--- |
| 34 | Should be used to fund new programs |
| 9 | Should be used for some other purpose (VOL.) |
| $\frac{4}{100}$ | Don't know/Refused |

## ASK FORM 2 ONLY: [ $\mathrm{N}=600]$

Q.26F2 President Clinton has proposed setting aside approximately two-thirds of an expected budget surplus to fix the Social Security system. What do you think the leaders in Washington should do with the remainder of the surplus? Should the money be used for a tax cut, OR should it be spent on programs for education, the environment, health care, crime-fighting and military defense?

| 27 | Should be used for a tax cut |
| :---: | :--- |
| 65 | Should be spent on programs |
| 5 | Should be used for some other purpose (VOL.) |
| $\frac{3}{100}$ | Don't know/Refused |

## ASK ALL:

Q. 27 Generally, which approach to cutting taxes would you prefer - a 10 percent across-the-board income tax cut that would apply equally to all Americans, regardless of how much money they make; OR, targeted tax benefits designed to help offset the costs of education, child care, and long-term care for lower and middle class Americans?

| 37 | 10\% across-the-board income tax cut |
| :---: | :--- |
| 58 | Targeted tax benefits for lower and middle class |
| 2 | Neither (VOL.) |
| $\frac{3}{100}$ | Don't know/Refused |

Q.27a Next, I'd like your opinion on some programs and proposals that are being discussed in this country today. For each one, please tell me how important it is for Congress to do. (First,...) (INSERT ITEM; ROTATE ITEMS) - is this a very important, somewhat important, not too important, or not at all important thing for Congress to do?
a. A 10 percent across-the-board income tax cut that would apply equally to all Americans
b. Eliminating the so-called "marriage penalty", which taxes some married couples at a higher
rate than if they filed as single people
c. Increasing the amount of money senior citizens can earn before their Social Security benefits are reduced
d. Providing tax credits to people who provide long-term care to elderly or disabled family members
e. Cutting the capital gains tax

| 23 | $7=100$ |
| 28 | $6=100$ |
| 32 | $6=100$ |

Q. 29 Thinking back over the past year, what grade would you give the press for the way it has covered the investigation and impeachment trial of Bill Clinton? Would you grade the press an A, B, C, D, or F?

| 13 | A |
| :--- | :--- |
| 26 | B |
| 28 | C |
| 17 | D |
| 14 | F |
| $\frac{2}{100}$ | Don't know/Refused |
| 2.1 | Mean Rating |

Q. 30 In your opinion, how much, if at all, has the investigation and impeachment of Bill Clinton hurt the country a great deal, a fair amount, not very much, or not at all?

| 31 | Great deal |
| :--- | :--- |
| 32 | Fair amount |
| 24 | Not very much |
| 12 | Not at all |
| $\frac{1}{100}$ | Don't know/Refused |

For Mid-January 1999, January 1999 and Late December 1998 trend figures based on different question, "Based on what you know at this point, do you think that Bill Clinton should or should not be removed from office?"

For early December 1998, November 1998 and October 1998 trend figures based on slightly different question, "Based on what you know at this point, do you think that Bill Clinton should or should not be impeached and removed from office?"
Q. 31 The law that provides for an independent counsel to look into possible wrongdoing by presidents and senior members of their administrations is currently up for renewal. Do you think this law should be renewed, or not?

| 57 | Should be renewed |
| :--- | :--- |
| 38 | Should not |
| $\frac{5}{100}$ | Don't know/Refused |

Finally, I'd like to ask you a few questions for statistical purposes only...
Q. 32 Do you use a computer at your workplace, at school, or at home on at least an occasional basis?

17
The 1995 figure combines responses from two separate questions:
(1) Do you or anyone in your household ever use a modem to connect to any computer bulletin boards, information services such as CompuServe or Prodigy, or other computers at other locations? (IF YES, PROBE: Is that you, someone else or both?)
(2) Do you, yourself, ever use a computer at (work) (school) (work or school) to connect with computer bulletin boards, information services such as America Online or Prodigy, or other computers over the Internet?
