#### Abstract

ABOUT THE NEWS INTEREST INDEX SURVEY Results for the weekly News Interest Index survey are based on telephone interviews among a nationwide survey of 1,027 adults, 18 years of age or older, conducted under the direction of ORC (Opinion Research Corporation). For results based on the total sample, one can say with 95\% confidence that the error attributable to sampling is plus or minus 3.5 percentage points. For results based on the 599 respondents who watched or heard about the CNN/YouTube debate, the margin of error is plus or minus 4.5 percentage points.

In addition to sampling error, one should bear in mind that questions wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

[^0]:    1 In March 2007 the question was worded: "Do you approve or disapprove of the policies and proposals of the Democratic leaders in Congress?"
