## Hispanics of Nicaraguan Origin in the United States, 2011

An estimated 395,000 Hispanics of Nicaraguan origin resided in the United States in 2011, according to the Census Bureau's American Community Survey. Nicaraguans in this statistical profile are people who self-identified as Hispanics of Nicaraguan origin; this means either they themselves are Nicaraguan immigrants or they trace their family ancestry to Nicaragua. Nicaraguans are the 12th-largest population of Hispanic origin living in the United States, accounting for 0.8% of the U.S. Hispanic population in 2011. Mexicans, the nation's largest Hispanic origin group, constituted 33.5 million, or 64.6%, of the Hispanic population in 2011.<sup>1</sup>

This statistical profile compares the demographic, income and economic characteristics of the Nicaraguan population with the characteristics of all Hispanics and the U.S. population overall. It is based on tabulations from the 2011 American Community Survey by the Pew Hispanic Center, a project of the Pew Research Center. Key facts include:

- **Immigration status.** Six-in-ten Nicaraguans (60%) in the United States are foreign born compared with 36% of Hispanics and 13% of the U.S. population overall. Four-in-ten immigrants from Nicaragua (40%) arrived in the U.S. in 1990 or later. More than half of Nicaraguan immigrants (53%) are U.S. citizens.
- **Language.** About six-in-ten (62%) Nicaraguans ages 5 and older speak English proficiently.<sup>2</sup> The other 38% of Nicaraguans report speaking English less than very well, compared with 34% of all Hispanics.
- **Age.** Nicaraguans are younger than the U.S. population but older than Hispanics overall. The median age of Nicaraguans is 32; the median ages of the U.S. population and all Hispanics are 37 and 27, respectively.
- **Marital status.** Nicaraguans ages 15 and older are about as likely to be married (44%) as Hispanics overall (43%) but less likely to be married than the U.S. population overall (48%).
- **Fertility.** About one-in-twenty (6%) Nicaraguan women ages 15 to 44 gave birth in the 12 months prior to this survey. That was similar to the rate for all Hispanic women—8%—and the same as the overall rate for U.S. women.

---

<sup>1</sup> Percentages are computed before numbers are rounded.

<sup>2</sup> This includes Nicaraguans ages 5 and older who report speaking only English at home or speaking English very well.

- **Regional dispersion.** Nicaraguans are concentrated in the South (54%), mostly in Florida (36%), and in the West (35%), mostly in California (31%).
- **Educational attainment.** Nicaraguans have higher levels of education than the Hispanic population overall but lower levels than the U.S. population overall. Two-in-ten (20%) Nicaraguans ages 25 and older—compared with 13% of all U.S. Hispanics and 29% among the entire U.S. population—have obtained at least a bachelor’s degree.
- **Income.** The median annual personal earnings for Nicaraguans ages 16 and older were \$22,000 in the year prior to the survey—higher than the median earnings for all U.S. Hispanics (\$20,000) but lower than the median earnings for the U.S. population (\$29,000).
- **Poverty status.** The share of Nicaraguans who live in poverty, 18%, is higher than the rate for the general U.S. population (16%) and less than the rate for Hispanics overall (26%).
- **Health Insurance.** Three-in-ten Nicaraguans (31%) do not have health insurance compared with 30% of all Hispanics and 15% of the general U.S. population. Additionally, 10% of Nicaraguans younger than 18 are uninsured.
- **Homeownership.** The rate of Nicaraguan homeownership (44%) is similar to the rate for all Hispanics (46%) and lower than the 65% rate for the U.S. population as a whole.

### About the Data

This statistical profile of Hispanics of Nicaraguan origin is based on the Census Bureau's 2011 [American Community Survey](#) (ACS). The ACS is the largest household survey in the United States, with a sample of about 3 million addresses. The data used for this statistical profile come from 2011 ACS Integrated Public Use Microdata Series (IPUMS), representing a 1% sample of the U.S. population.

Like any survey, estimates from the ACS are subject to sampling error and (potentially) measurement error. Information on the ACS sampling strategy and associated error is available at [http://www.census.gov/acs/www/methodology/methodology\\_main/](http://www.census.gov/acs/www/methodology/methodology_main/). An example of measurement error is that citizenship rates for the foreign born are estimated to be overstated in the Decennial Census and other official surveys, such as the ACS (see Jeffrey Passel, “[Growing Share of Immigrants Choosing Naturalization](#),” Pew Hispanic Center, Washington, D.C. (March 28, 2007)). Finally, estimates from the ACS may differ from the Decennial Census or other Census Bureau surveys due to differences in methodology and data collection procedures (see, for example, [http://www.census.gov/acs/www/Downloads/methodology/ASA\\_nelson.pdf](http://www.census.gov/acs/www/Downloads/methodology/ASA_nelson.pdf), <http://www.census.gov/hhes/www/laborfor/laborfactsheet092209.html> and <http://www.census.gov/hhes/www/poverty/about/datasources/factsheet.html>).

<sup>1</sup>Unmarried women includes those who were never married, divorced, separated or widowed. <sup>2</sup>For detailed information on how poverty status is determined, see <http://usa.ipums.org/usa-action/variables/POVERTY>. Due to the way in which the IPUMS assigns poverty values, these data will differ from those that might be provided by the U.S. Census Bureau. <sup>3</sup>The household population excludes persons living in institutions, college dormitories and other group quarters.

Note: Numbers may not sum to the total due to rounding. Analysis is based on the following number of observations: all 3,112,017; Hispanics 427,432; Hispanics of Nicaraguan origin 3,265. The symbol \*\*\* indicates insufficient number of observations to provide a reliable estimate.
