Numbers below represent the rolling average of three independent rounds of coding for each country, covering the following time periods: July 1, 2006, through June 30, 2007; July 1, 2007, through June 30, 2008; and July 1, 2008, through June 30, 2009. The mid-2008 period is the average of the first year (July 1, 2006, through June 30, 2007) and the second year (July 1, 2007, through June 30, 2008). The mid-2009 period is the average of the second year (July 1, 2007, through June 30, 2008) and the third year (July 1, 2008, through June 30, 2009). As a result, scores below may not match the values for response options shown above.

For GRI.Q.3, the differences between the coding periods may not be as significant as they appear due to minor changes in coding procedures. See Methodology for more details.

## Social Hostilities Involving Religion

SHI.Q.1 Were there crimes, malicious acts or violence motivated by religious hatred or bias?
0 points (0.00) = No
1/6 point (0.17) = Yes, harassment/intimidation (see SHI.Q.1.a)
1/6 point (0.17) = Yes, property damage (see SHI.Q.1.b)
1/6 point (0.17) = Yes, detentions/abductions (see SHI.Q.1.c)
1/6 point (0.17) = Yes, displacement from homes (see SHI.Q.1.d)
1/6 point (0.17) = Yes, physical assaults (see SHI.Q.1.e)
1/6 point (0.17) = Yes, deaths (see SHI.Q.1.f)

This is a summary table that captures the hostilities identified in questions 1.a-f into a single measure indicating the severity of religious hatred or bias in each country.

If one type of hostility occurred in both years of a period, the country received 1/6 point for that period; if a type of hostility occurred in just one of the two years, the country received 1/12 point. Countries can have multiple types of hostilities. The scores on this question are cumulative; a country with three types of malicious acts in both years of a period would score 0.50 (after rounding) for that period and a country with all six types in both years would score 1.00 (after rounding). For example, a country with harassment, property damage and physical assaults in both years and deaths in one year would score 0.58 (1/6 + 1/6 + 1/6 + 1/12).

Data shown below for the period ending in mid-2008 reflects a minor correction to data published in the baseline report.

**SHI.Q.1.a Did individuals face harassment or intimidation motivated by religious hatred or bias?**

0 points (0.00) = No

Full point (1.00) = Yes

This question is a component of SHI.Q.1. Numbers below represent the rolling average of three independent rounds of coding for each country, covering the following time periods: July 1, 2006, through June 30, 2007; July 1, 2007, through June 30, 2008; and July 1, 2008, through June 30, 2009. The mid-2008 period is the average of the first year (July 1, 2006, through June 30, 2007) and the second year (July 1, 2007, through June 30, 2008). The mid-2009 period is the average of the second year (July 1, 2007, through June 30, 2008) and the third year (July 1, 2008, through June 30, 2009). As a result, scores below may not match the values for response options shown above.

SHI.Q.4 Were religion-related terrorist groups active in the country?
0 points (0.00) = No
1/4 point (0.25) = Yes, but their activity was limited to recruitment and fundraising
1/2 point (0.50) = Yes, with violence that resulted in some casualties (1-9 injuries or deaths)
3/4 point (0.75) = Yes, with violence that resulted in multiple casualties (10-50 injuries or deaths)
Full point (1.00) = Yes, with violence that resulted in many casualties (more than 50 injuries or deaths)

Religion-related terrorism is defined as politically motivated violence against noncombatants by subnational groups or clandestine agents with a religious justification or intent. Numbers below represent the rolling average of three independent rounds of coding for each country, covering the following time periods: July 1, 2006, through June 30, 2007; July 1, 2007, through June 30, 2008; and July 1, 2008, through June 30, 2009. The mid-2008 period is the average of the first year (July 1, 2006, through June 30, 2007) and the second year (July 1, 2007, through June 30, 2008). The mid-2009 period is the average of the second year (July 1, 2007, through June 30, 2008) and the third year (July 1, 2008, through June 30, 2009). As a result, scores below may not match the values for response options shown above.

Data shown below for the period ending in mid-2008 reflects a minor update using new information not available at the time of the baseline report. Some of the increase in religion-related terrorism between mid-2008 and mid-2009 could reflect the use of new source material providing greater detail on terrorist activities than was provided by sources used in the baseline report. See Methodology for more details.

Religion-related war is defined as armed conflict (involving sustained casualties over time or more than 1,000 battle deaths) in which religious rhetoric is commonly employed to justify the use of force, or in which one or more of the combatants primarily identifies itself or the opposing side by religion. Numbers below represent the rolling average of three independent rounds of coding for each country, covering the following time periods: July 1, 2006, through June 30, 2007; July 1, 2007, through June 30, 2008; and July 1, 2008, through June 30, 2009.
